A statement or proposition that, despite sound (or apparently sound) reasoning from acceptable premises, leads to a conclusion that seems senseless, logically unacceptable, or self-contradictory
- a potentially serious conflict between quantum mechanics and the general theory of relativity known as the information paradox

A seemingly absurd or self-contradictory statement or proposition that when investigated or explained may prove to be well founded or true
- in a paradox, he has discovered that stepping back from his job has increased the rewards he gleans from it

A situation, person, or thing that combines contradictory features or qualities
- the mingling of deciduous trees with elements of desert flora forms a fascinating ecological paradox

Thanks for this!
