To be honest I didn't really want to vote for any of these.

But I voted for #1 as the render looks a lot more HQ and they colors are a lot better and eye appealing.

As for the #2 the render looks sketched and the skin on here is bright yellow. There also seems to be some sort of weird shape to the right of her head. The background is not very well made and the text is in an awkward position and is really annoying to look at, seems like there's a pattern and scanlines in the text.

For some weird reason, I like the bevel/embossed text on the Naruto one, lol? I've voted for #1 because it's easy on the eyes.

I like ZeynTm's a lot better. I agree with feline, it's easier to look at and better rendered.

Bad Meets Evil - September 9, 2011, 9:50 pm

Sorry buddy, I'm gonna have to go with ZeynTm's.

Lychees - September 10, 2011, 11:12 am

i like ZeynTm's his text so i vote ZeynTm

Riku9182 - September 11, 2011, 8:40 am

Definitely ZeynTm's

Render on it is sexy

Both are rather horrible to be honest.

I would have voted for the first one as it looks a bit more appealing compared to the second one, but it still isn't executed very well.

I went with ZeynTm's on this one because the overall sig is smoother, especially the render. His colors also looked more natural.

For all of you that saying the render is not smooth.I made it that for a reason i thought it looked like a nice effect.The real render was hd.
