Thread: [How to get dlc or iap for most games](#)

Alside - September 8, 2011, 5:13 pm

Open Cydia and add the source "idwaneo.org/repo"

Let it load.

Search Cydia for the DLC you want a voila! Most of them are there

download witch ever one you want respring go in the game and the content or gun or whatever the dlc or iap should be unlocked??

little tip:say a iap(in app purchase) was gold on a game download it respring let the game load see if you got the gold buy all the stuff you want wast the most money possible buy everything uninstall the dlc from cydia and then re-download the dlc respring then when you ga back to the game it should have all the money plus everything you had bought before

iRun - September 8, 2011, 5:36 pm

Wow thanks! I will definitely be trying this! Nice share! :)

Alside - September 8, 2011, 6:54 pm

No problem glad you liked it it's really nice this repo and gets updated alot :)

Alside - September 12, 2011, 5:56 pm

Bump this thred I thought it was a good thee and should be seen

Command Prompt - October 28, 2011, 5:30 pm

Nice, both of our methods work equally as good :}

Grin - October 28, 2011, 6:38 pm

I know this...

But some games require you to play it first.

And a respring is not necessary for MOST apps.

Well most people don't ok... So that is good for you...

Kewlhotrod - October 28, 2011, 9:47 pm

Just get IAPP Cracker, it works very well for most games.

Alside - October 28, 2011, 9:52 pm

Then in-app purchases for most games automatically return as accepted. Say you were playing an RPG and wanted to buy gold in their store... You just buy it. Ta-da, done. It's less effort than your method.
