Was pretty good !

Its the first crypter which has a transformation matrix. Also the free crypting promotion is over. This means that stub sizes will reduce even more and FUD's will last much longer. Lastly on certain days of the month there will be "promotion" days where the crypter will be available to the public for use.

mich125 - September 9, 2011, 1:46 am

Is there something wrong with your site <http://www.wtfud.net> ?

Clicking register now, gives me an error "object not found"

[R]eaper - September 9, 2011, 1:51 am

(Sep 9, 2011 01:46 AM)mich125 Wrote: [\[CITE\]](#) Is there something wrong with your site <http://www.wtfud.net> ?

Clicking register now, gives me an error "object not found"
Site works fine for me, try clearing your cache?

EDIT: The coder just said he is finishing up the registration system, we are just waiting for a few things to finalize, sorry about the wait. You can order now manually if you would like, add wtfud@live.com or just wait until tomorrow for the registration system to be fully functional.

To The Limits - September 9, 2011, 1:54 am

This seems a great product. I will use it for sure! ?

The coder just said he is finishing up the registration system (the crypter is working and FUD), we are just waiting for a few things to finalize, sorry about the wait. You can order now manually if you would like, add wtfud@live.com or just wait until tomorrow for the registration system to be fully functional.

Ali?s - September 9, 2011, 4:40 am

I got excited because I thought this was for crypting Rats online... :c
lol anyways GL with your sales!

_char - September 9, 2011, 4:49 am

Good luck with sales! Hope this lasts longer than Damla Crypter! ?

Dabeh - September 9, 2011, 4:52 am

Why do i find it complete bullshit it was coded in Assembly?

_char - September 9, 2011, 4:54 am

(Sep 9, 2011 04:52 AM)Dabeh Wrote: [\[CITE\]](#) Why do i find it complete bullshit it was coded in Assembly?

Man it really was coded in 100% assembly. They already had it done since they ran Damla crypter before scamming their customers. So don't try to say it isn't ASM.

Dabeh - September 9, 2011, 4:56 am

(Sep 9, 2011 04:54 AM)_char Wrote: [\[CITE\]](#) Man it really was coded in 100% assembly. They already had it done since they ran Damla crypter before scamming their customers. So don't try to say it isn't ASM. Not saying it isn't assembly, just saying I doubt it very much. Actually, I don't see any proof it is coded in assembly.

Burnzy - September 9, 2011, 5:22 am

Crypter Source

\$3500

you got to be fucking me??

anyway will try this out...

[R]eaper - September 9, 2011, 5:26 am

(Sep 9, 2011 05:22 AM)-skynet190- Wrote: [\[CITE\]](#) Crypter Source

\$3500

you got to be fucking me??

anyway will try this out...

TBH \$3500 is kinda under priced, the crypter has its own transformation matrix (never done before) and is completely coded in asm. But hopefully you enjoy it when you try it out as it is the only crypter to have a FUD stub size which is always under 10kb.

(Sep 9, 2011 04:40 AM)Francisco™ Wrote: [\[CITE\]](#) I got excited because I thought this was for crypting Rats online... :c

lol anyways GL with your sales!

Thanks for the comment, and what do you mean by crypting Rats online? This is a online crypter so you get your rat file and then upload to the site and it will crypt the file for you.

(Sep 9, 2011 04:52 AM)Dabeh Wrote: [\[CITE\]](#) Why do i find it complete bullshit it was coded in Assembly?

Believe what you want, Majority people know it is coded in asm and I have no doubt about this either. You can try and find another crypter where the stub size is always under 10kb.

(Sep 9, 2011 04:49 AM)_char Wrote: [\[CITE\]](#) Good luck with sales! Hope this lasts longer than Damla Crypter! ?

1. Thanks for the wish's with sales.
2. Damla lasted around 3 months and nu11 wasn't involved.
3. Damla ran its lifetime so technically there was no scam.
4. This is WTFUD and not Damla.

Lastly no-one has been scammed and don't forget you have dropped attworm, para crypter and your booter hasn't been online for over a month.

I don't go into your thread causing trouble so don't cause it here. Now lets just keep on-topic.

S?N - September 9, 2011, 6:24 am

Vouch for WTFUD. When this site was still doing free FUD Crypting, it was flawless. So, Vouch to

WTFUD Crypter!

I dont have any money. No PP, AP, etc... I can only trade steams, filehosting, and other accounts. Unless you can verify my PP. Tom ill try making a canadian pp. Hopefully I can get this crypter.

[R]eaper - September 9, 2011, 7:23 am

(Sep 9, 2011 07:20 AM)S?N Wrote: [\[CITE\]](#) I dont have any money. No PP, AP, etc... I can only trade steams, filehosting, and other accounts. Unless you can verify my PP. Tom ill try making a canadian pp. Hopefully I can get this crypter.

Oh ok, well good luck with finding a way to get it. I suggest maybe getting a prepaid credit card as plimus accepts cc payments. Once again good luck :)

Lysergic - September 9, 2011, 9:24 am

Lol I wish the price's weren't so high. (60\$ a month is to expensive even for an ASM crypter).

petironaldo - September 9, 2011, 11:15 am

Great crypter good luck with sales bro :) !

cmoisarah - September 9, 2011, 11:18 am

This seems a great product i will buy

stringback - September 9, 2011, 11:52 am

i want to buy :P pm when u are on nu11 told me it works very well

Noribus - September 9, 2011, 1:36 pm

this is not worth it it dont even have RunPE pfft

SIM-595622 - September 9, 2011, 2:35 pm

Those of us who bought this from aadster and ckenen and had it fud for like two days. Do we get anything?

daemon10 - September 9, 2011, 2:58 pm

I also purchased unlimited and it was online for 2 days and disappeared.. now what?

[R]eaper - September 9, 2011, 4:37 pm

(Sep 9, 2011 09:24 AM)X Tee Wrote: [\[CITE\]](#) Lol I wish the price's weren't so high. (60\$ a month is to expensive even for an ASM crypter).

The reason the price's are so high is so the crypter is only bought by limited number of people so the FUD lasts longer.

(Sep 9, 2011 11:15 AM)petironaldo Wrote: [\[CITE\]](#) Great crypter good luck with sales bro :) !

Thanks for the comment, hopefully you choose to buy it.

(Sep 9, 2011 11:18 AM)cmoisarah Wrote: [\[CITE\]](#) This seems a great product i will buy Looking forward to having you as a customer.

Alright, thanks for the feedback. After we get all the back-end work done we will work on the User interface's.

American Apathy - September 10, 2011, 11:18 am

It is a good crypter, someone is just mad his sales are dropping so pay no attention to that. If you build your server correctly you won't have trouble. Reaper let me know if you need someone to get settings for RAT's then just throw up on the site.

Fiery Dreamer - September 10, 2011, 11:37 am

Does this crypter support icon replacement and startup features?

Nvm, \$60 a month is far too high.

XeX - September 10, 2011, 11:48 am

Really ncie crypter i might buy it when i get the money

daemon10 - September 10, 2011, 2:41 pm

still nobody comes online.. never get my support.

[R]eaper - September 10, 2011, 11:10 pm

(Sep 10, 2011 11:18 AM)Demoralize Wrote: [\[CITE\]](#) It is a good crypter, someone is just mad his sales are dropping so pay no attention to that. If you build your server correctly you won't have trouble. Reaper let me know if you need someone to get settings for RAT's then just throw up on the site.

Thanks for the comment. It is a very basic crypter to use (settings wise), its as simple as build your server and then upload to the site.

(Sep 10, 2011 11:37 AM)?ThunDer? Wrote: [\[CITE\]](#) Does this crypter support icon replacement and startup features?

Nvm, \$60 a month is far too high.

Start-up has been added, just waiting for the php guy to implement it on the website. Also Icon replacement will be a future feature, however it will increase the output size. Also \$60.00 a month is a fine price as this crypter is completely coded in asm and the client database is not as big compared to other crypters. This means the FUD will last longer.

(Sep 10, 2011 11:48 AM)XeX Wrote: [\[CITE\]](#) Really ncie crypter i might buy it when i get the money
Thanks for the feedback, hopefully you will become a customer soon.

(Sep 10, 2011 02:41 PM)daemon10 Wrote: [\[CITE\]](#) still nobody comes online.. never get my support.
Please pm me your inquiry, the coders do have a life and cannot be on 24/7.

(Sep 9, 2011 01:36 PM)Noribus Wrote: [\[CITE\]](#) this is not worth it it dont even have RunPE pfft
Your sir are a fucking retard, of course the crypter has a runPE.

Flightofstairs - September 10, 2011, 11:27 pm

This crypter seems really legit, I will helping out as much as I can as well. first ASM crypter on hf I have seen that is being sold and updated. Once site is fully up 100% you will see how great it is.

Matty - September 10, 2011, 11:39 pm

\$3,500 for a lifetime crypter ?

I could hire someone to make me my own crypter with 100 unique stubs that'll probably last longer than yours for a fraction of the that.

Flightofstairs - September 11, 2011, 1:37 am

(Sep 10, 2011 11:39 PM)M???? Wrote: [\[CITE\]](#) \$3,500 for a lifetime crypter ?

I could hire someone to make me my own crypter with 100 unique stubs that'll probably last longer than yours for a fraction of the that.

A private offline asm crypter for life, is what it looks like to me. Private proly means your own I am not 100% on that tho. If so that's a good deal.

[R]eaper - September 11, 2011, 1:37 am

(Sep 10, 2011 11:39 PM)M???? Wrote: [\[CITE\]](#) \$3,500 for a lifetime crypter ?

Yea sure I will do this, please be patient however as we are still implementing a final system.

(Sep 12, 2011 09:46 AM)daemon10 Wrote: [\[CITE\]](#) support is bullshit i contacted owner and he said he will read me in 2 hours and he never did...

WTF says:

kk

gotta run i added stub but not done with site, will be done with it in a few hours and add you
Please stop saying the support is bullshit, we keep you updated on what is happening. We are in the final stages of creating the registration system (it was majorly delayed due to a fault with plimus). Once we are sorted I will add you myself. Also remember people are busy and have lives too, we all need sleep as well.

(Sep 12, 2011 11:21 AM)Bytes Wrote: [\[CITE\]](#) Was looking to buy, but not if its like this.

I have message that user on how we are going to sort his "problem" out. Please do not misunderstand the comment. It is not our fault if we are waiting for a 3rd party so we can finalize the system. Also I am on nearly 18 hours a day, its ok if the responses are delayed a little bit. We are not the only product to have technical issue's where clients cannot access products / services. For example look at blackshades, they do occasionally go down for a few days even weeks sometimes. However we are trying our best to rectify the situation asap.

Flightofstairs - September 12, 2011, 4:37 pm

As soon as all of it is done you guys will see how it will fall into place nothing when being built up is perfect till its done. WTFud is being sold as the site is being built and plimus is being implemented to better suit a lot of you members. If Reaper is not on and you cant get a hold of him, PM me and I will make sure to get it to him as soon as I see him.

As always please keep the flaming out, support is here to help you with serious matters.

American Apathy - September 12, 2011, 7:10 pm

(Sep 12, 2011 03:35 PM)[R]eaper Wrote: [\[CITE\]](#) Yea sure I will do this, please be patient however as we are still implementing a final system.

Please stop saying the support is bullshit, we keep you updated on what is happening. We are in the final stages of creating the registration system (it was majorly delayed due to a fault with plimus). Once we are sorted I will add you myself. Also remember people are busy and have lives too, we all need sleep as well.

I have message that user on how we are going to sort his "problem" out. Please do not misunderstand the comment. It is not our fault if we are waiting for a 3rd party so we can finalize the system. Also I am on nearly 18 hours a day, its ok if the responses are delayed a little bit. We are not the only product to have technical issue's where clients cannot access products / services. For example look at blackshades, they do occasionally go down for a few days even weeks sometimes. However we are trying our best to rectify the situation asap.

Seems like you could use some support my friend :D.

Flightofstairs - September 12, 2011, 7:16 pm

(Sep 12, 2011 07:10 PM)Demoralize Wrote: [\[CITE\]](#) Seems like you could use some support my friend :D.

Right now it is just site end stuff and waiting on plimus to be done. Support will come after if the load gets to be to much. I am helping as well, just waiting on site stuff to finish up.

[R]eaper - September 12, 2011, 9:20 pm

Plimus is up and running, you can order now through the website. After payment please send me a pm and I will activate you accounts. We are also FUD atm.

PhuongBum - September 13, 2011, 6:06 am

60\$ for one month is the most expensive crypter I ever see at HF :) Good luck

[R]eaper - September 13, 2011, 6:37 am

(Sep 13, 2011 06:06 AM)ya4c34 Wrote: [\[CITE\]](#) 60\$ for one month is the most expensive crypter I ever see at HF :) Good luck

There is a reason why the price is set as this, this is the first fully coded crypter in asm.

JuryBen - September 13, 2011, 11:12 am

Not really..., but I do agree with the price. People don't understand how long it takes to undetected code not done in .Net.

[R]eaper - September 13, 2011, 3:44 pm

(Sep 13, 2011 11:12 AM)JuryBen Wrote: [\[CITE\]](#) Not really..., but I do agree with the price. People don't understand how long it takes to undetected code not done in .Net.

Yea probably should mention that too, re-FUDing takes a lot more effort from the coders as well so that is another reason why.

DarkSonS - September 13, 2011, 4:17 pm

I have bought it, its FUD and working fine for my ngr bot :)

I hope it will work long time!

Blackpear~A.k.A~Blue - September 13, 2011, 4:22 pm

No me and my friend coded one xD ^^

By the ways good luck and it's look great

Thanks, but does your crypter have a transformation matrix? ?

daemon10 - September 14, 2011, 10:06 am

Needs FUD'ing..

http://scan4you.net/result.php?id=bd2e5_kbdr6

Expect this to happen often.

Just letting you know.

daemon10 - September 14, 2011, 11:09 am

Yeah we will see they had this problem last time before they went offline so we will see if this support got any better.

Flightofstairs - September 14, 2011, 11:28 am

The detections will be looked at and worked on. Do not worry it will be updated.

Pro™ - September 14, 2011, 1:43 pm

This is a really nice looking crypter but it shouldnt really get more than 1 detection that quick because I heard its pure ASM.

daemon10 - September 14, 2011, 3:16 pm

its around 3-4 now.. its not that it has the detection its how fast they fud it

[R]eaper - September 14, 2011, 3:41 pm

4 Detection's isn't too bad, because HF isn't the only forum where the crypter is being sold there are other customer's who are using it. From my knowledge we have a couple of customer's with 50k + botnets. Will speak to coder when they are on. Also this FUD lasted 4-5 days which is pretty impressive whereas some vb crypters last 1-2 MAX.

Blackpear~A.k.A~Blue - September 14, 2011, 3:53 pm

I'm a java coder I've just helped My friend on doing some shit in C++ since java and c are like the same ALMOST xD

So I mainly don't know what you are talking about ^^"

But anyways we are not planing to releashe it xD ^^"

DarkSonS - September 14, 2011, 5:23 pm

Hm, never heard about transformation matrix =X

[R]eaper - September 14, 2011, 7:39 pm

Crypter has been re-fudded, just in a testing phase to ensure quality is kept up. Should be uploaded to the engine within the next 24 hours (the coders have a life too). Also we are currently thinking of making an advanced stub so FUDness time can be maximised.

_char - September 15, 2011, 5:19 am

are nu11 and icarus still the ones who run it?

BlackHops - September 15, 2011, 6:06 am

Vouch for ramon, good guy. Seen this on open sc.

Also atthackers doesn't like this crypter therefore it is good ;)

[R]eaper - September 15, 2011, 6:25 am

Haha, thanks for the vouch and your statement is very true as well. You will also be happy to know "nu11" from opensc is one of the coders for this awesome crypter :)

daemon10 - September 15, 2011, 4:07 pm

Still no changes not fud

http://scan4you.net/result.php?id=5cf67_kek1o

4 detections... (3 big av companys) we will see if it changes within 24 hours.

Flightofstairs - September 15, 2011, 7:16 pm

It is in testing phase as was last stated, please wait for post saying that main engine was updated with fud stub/code to say its not fud.

BlackHops - September 15, 2011, 7:45 pm

(Sep 15, 2011 06:25 AM)[R]eaper Wrote: [\[CITE\]](#) Haha, thanks for the vouch and your statement is very true as well. You will also be happy to know "nu11" from opensc is one of the coders for this awesome crypter :)

Nu11 is an extremely capable coder.

For those who don't know him, he's the guy who made the 0 byte patch for ngr (the fixed execution rate crack not the shitty dns hooking one that people were selling)

iDarky - September 15, 2011, 10:12 pm

Lool.

You do know that nu11, simply resold the ngrBot for Drizzle =)

daemon10 - September 16, 2011, 4:24 am

(Sep 15, 2011 07:16 PM)Colin_ Wrote: [\[CITE\]](#) It is in testing phase as was last stated, please wait for post saying that main engine was updated with fud stub/code to say its not fud.

Then dont take money from people if you are in test phase ? Kapish

Quoted for the truth. Everyone gives nu11 credits when all he did was sell for drizzle.

_char - September 16, 2011, 5:05 am

As far as i know they had 10days free for people as a 'testing' faze and now they are selling...So why sell a product if its still in 'testing' faze?

Flightofstairs - September 16, 2011, 8:34 am

If you were to read all the posts, the stub is in testing phase to make sure its all alright. Do not try and put things in the wrong context.

daemon10 - September 16, 2011, 10:23 am

(Sep 16, 2011 08:34 AM)Colin_ Wrote: [\[CITE\]](#) If you were to read all the posts, the stub is in testing phase to make sure its all alright. Do not try and put things in the wrong context.

Cool Story, Bro

Scan Results: 8/35

http://scan4you.net/result.php?id=42389_kg670

DarkSonS - September 17, 2011, 2:45 am

Its 16 Detected now, i am waiting for refud.

daemon10 - September 17, 2011, 6:16 am

(Sep 17, 2011 02:45 AM)darkSons Wrote: [\[CITE\]](#) Its 16 Detected now, i am waiting for refud.

It may be next year or so lol.... sorry if you have purchased this but next time before you buy anything read the posts of other users.

Flightofstairs - September 17, 2011, 10:28 am

I will try and see what is going on with it, and talk to someone.

DarkSonS - September 17, 2011, 11:14 am

Now it is unable to connect in user pannel.

So i hope there will be new update soon.

[R]eaper - September 17, 2011, 7:03 pm

Closing thread until I can get in contact with the coders.
