Have you ever wanted to get someones ip, so easily, that they wouldnt expect it, Now you can with DeepZLog!. So, How do i use this?

Post here and pm me with the subject 'ICanHazLogger?'

Download file

upload to website

Then, Fill in the information

URL That the user should be redirected to,
Name of your personal logger

Then you will see

This is the link you send to your victims

This is the area where all the IP's are logged.

right click the link u send to victims, and copy the link url, then open where the ips are logged and you got the victims ip :D

TO GET THIS TOOL

You Must post in this thread, and then pm me with the subject 'iCanHazLogger?' and i will send it to you
