I am looking for a tool that can read emails. Same concept like a web-bot/spiders(Which their main job is to read information off of servers)

If you can find a tool(Or mabe you know somebody who is good at coding tools) that can read emails then we have something to talk about.

? ILL?mi??TI ? - October 25, 2009, 2:16 pm

Very nice, you should add the passwords tho

Fortified - October 25, 2009, 2:38 pm

Nice collection man, though some links dont work

Crakk.Hed.Hampsta - October 25, 2009, 4:11 pm

[color=#FF4500]Great List, I liked your other ones too,,?

The only problem i've found, and i can see others have the same problem...is with passwords being needed on some of the .zips..?

Also i downloaded Morphine 2.7 and when i ran the .exe a cmd window popped up for about a second then closed, and nothing else happened. Nothing opened up in my task manager either, any idea what to do?

zega190 - October 25, 2009, 7:44 pm

Anyone have any idea on how to get the google wave invite tool to work?
