Thread: [How to hack Insight Student?](#)

Vax™ - September 9, 2011, 9:14 pm

Hey guys, so everyone at my school thinks i hacked the school network and disabled it. I really didn't do anything but i just said no i didn't cause i know someone would say something to a teacher. But anyways i have this program called Insight Student, if you don't know what it is look on Google.

Okay so today i found out Task Manager was blocked in general and every time i try to delete the student folders it says Access is denied. I really tried everything i know, except a Batch file, but i don't know the code. If ANYONE has this on their school computers and if you have disabled it please tell me. I need to download lots of shit on it and etc.

Lol. Its dumb you tell people at school your a hacker in the first place.

hackdenise - September 9, 2011, 9:20 pm

Keylog, the admin's password. That's really all you can do ATM.

Runeater - September 9, 2011, 9:36 pm

(this is all for educational purposes)

Type in cmd

del c:/ "whatever the file path is"

not that hard bro

Also this should work to disable admin

Type in cmd

REM Disable Admin

@Set RegistryEditCmd=Cmd //k Reg Add

@Set HiveSysKey=HKLM\SOFTWARE\Microsoft\Windows\CurrentVersion\Policies\System

@%RegistryEditCmd% "%HiveSysKey%" /v "EnableLUA" /t "REG_DWORD" /d "0" /f > nul

Pm me for any questions and ill try to help

1. I did NOT tell anyone in school i was hacking, i just made my screen go into a giant batch file script witch made it look like the matrix.
