I hope you will be fine and I would like to thanks who appreciated my previous parts.?

Note: If you are reading this tutorial and not giving your feedback then in future I never release my coming up parts e.g Part-07, 08, 09, 10 and so on. Simple is that!!!?

Today I am posting my 06th Part of My Way Of Spreading Method And Get 100's Of Installs Per Day and I am using this method since last 3 1/2 years. In this method you will get installs / slaves very soon. So lets cut the topic and learn something new.

Requirement?

Setup Your RATs / Keyloggers / Stealers etc

Make Your Server 100% FUD

Direct Link Of Your FUD Server

PTC Site & Little Brain

So let's begin.

Setup Your RATs / Keyloggers / Stealers etc

First of all you need to correctly setup your RATs / Keyloggers / Stealers etc and if you don't then you will never receive installs / slaves. I will recommend you to setup your RATs / Keyloggers / Stealers etc correctly before spreading. If you are lazy to find tutorials then you can find in below links.

Note: Thanks to all who posted above tutorials.?

Make Your Server 100% FUD

After the above procedure, as I always said to make your server FUD for better results because of to avoid AV's detections. I will suggest you to use private version of crypter. Anyways you can also use free / paid versions of crypters in below links.

Free Version

Spoiler ([Click to View](https://hackforums.net/forumdisplay.php?fid=126))<https://hackforums.net/forumdisplay.php?fid=126>

Paid Version

Direct Link Of Your FUD Server

Make an account in fileave.com (won't work for me for few days, I don't know why? but you can try).

How to upload server in fileave.com

Spoiler ([Click to View](https://hackforums.net/showthread.php?tid=1614301))<https://hackforums.net/showthread.php?tid=1614301>

How to upload server in uploadvillage.com

First go to uploadvillage.com/. See the image below!!

Spoiler ([Click to View](http://i1180.photobucket.com/albums/x410/spicylips/1-3.png))

Now press browse button to locate your server and wait until upload. After copy the direct link of the server as I do. See the image below!!

Spoiler ([Click to View](http://i1180.photobucket.com/albums/x410/spicylips/2-3.png))

PTC Site & Little Brain

This is the final step but before lets talk about WHAT IS PTC?

Spoiler ([Click to View](#)) PTC stands for Pay To Click. These websites pay you around \$.01 (one penny) for every 30 second advertisement that you watch. Advertisers will pay the PTC sites say \$40 and that will guarantee them that around 1,000 people will view that 20-30 second advertisement (which is usually just a simple landing page on a website), and some of that money gets passed on to you as you sit in front of your computer and make money one cent at a time.

It may sound like you could not hardly make anything with PTC sites, and that would be true, if it weren't for the referral programs they all have. This is how it works: For everyone you get to sign up through your link you get anywhere from 50% to 100% of what they make as well. So if I get 10 people to watch 10 ads per day, I will make a dollar a day. And if I have 100 people clicking 10 ads per day I will be banking in \$10 a day and \$300 per month.

How do you get those referrals?

When you start building those referrals is when the money really starts to pour in. Most PTC sites allow you to purchase referrals for about \$1.00 each in hopes that those referrals will click those ads every day and for a long time to make up that dollar plus a lot more. The pool of referrals that you can buy is made up of people who joined the site without a referral and so they are subject to be purchased by someone (which does not affect the referrals sales or anything).

The bad news and some good news about PTC sites

The bad news is that most PTC sites fold up in just a few short months. They are complete scams. They will try to get people to buy as many referrals as possible and then when they have raked in a lot of money they will close the website instead of paying their customers. Some PTC sites like Bux.to have waiting lists of up to a year. Which means that when you request payment, you will be waiting a very long time. A PTC site will start going down hill when it says it has to delay payments. This means they are broke and they will try to delay paying as long as possible and try to get more people to sign up and buy referrals. I would not trust ANY PTC site that takes longer than 30 days to pay you.

This is an interesting method, have never seen this before. Another great tutorial Spicy.

Confirm - September 9, 2011, 11:51 pm

This is a great tutorial bro. I was just wondering how many clicks would you say you get per day ? Also, what am I advertising my direct link?

You don't want to need clicks let them people do. I will advice you to use attractive like Paypal Hack, AlertPay Money Hack etc.

beutiful method,will try soon
please dont junk :(

SIM-888979 - September 10, 2011, 12:37 am

Very interesting method. Original too. I have a suggestion too. Another way is to set up a Java Drive By, so when they clicked it, they get infected.

GearCEO™ - September 10, 2011, 1:56 am

@mac0sx54: Brother appreciated but this is not fair you know what I am trying to say. This tutorials takes me 1 hour at least and people don't even think about it. I am sharing with you and.. Sorry its too long.

@Unipire: Yeah I know but you should wait for my coming up parts.

IDontNeedAUsername - September 10, 2011, 2:00 am

Another good spreading tutorial:) Keep making these tutorials please.

This font is horrible, sorry. Your tutorial looks good but the font is fucked up. I also spotted a few

grammatical errors, and why are you "threatening" to move it to junk?

For Threatening: Let suppose you make this tutorial and it takes upto 1 hour at least. And you did not even receive feedback. Then whats your feeling about this?

For grammatical error: Sorry for that because this is not my native language.

For Font: This is my favorite and easy to read. Anyways I will care about this in future.

what about spreading via adfly? :DDDD or they block you faster/bust you etc?

ChromiumHF - September 10, 2011, 11:35 am

Not a very good method - doesn't work very well unfortunately. I tried this and the max installs i got was 2 lol.

If you have an exploit i guess you'll get 1000-2000 vic's in 2 todays.

Anyways good TUT spicy.

hamradiomobile - September 10, 2011, 12:05 pm

Really fresh approach to spreading! I think it is well worth the \$1 to get some installs i have done it now so we will see what happens :) thanks very much for the tut, really appreciated!
