Introduction

To organize the Remote Administration Tool section, the RAT's Crew have decided to create a directory for easier access to threads. The Directory will have sections such as Tutorials, Help Desks, Test Installs and Spreading Methods. This will be updating frequently! Posting on old threads can get you warned, so please do not grave dig if the threads are old.

Question ... I downloaded Hotfusion and scanned the exe before install, it shows up as infected but I am assuming that this is normal for a program of this sort?
