Theme Library v2

Information:

So i released a version of this earlier, but i had a download issue (when downloading the new file, i assigned the name of the file to the name on the library, which includes all kinds of illegal characters, not to mention it far exceeded the character, by like 20 characters. So anyways, i also added like 20 more themes. Oh, and, there are a number of themes i dont have included as they were, what i like to call, "PM only themes" in which i had to pm the author, but because im so damn lazy, i didnt. So ya, hit me up if you want me to add your theme, i will do it immedietly when i get home. As of now, i am hosting all of the source code for the themes on my server, thus you can download theme really easily, in an easy to read .txt file. I am slowly making a transistion to hosting the images as well, that just takes a little more time. SO, that being said, hit me up if you dont want your theme to be on this, and i will have no problem removing it. Also, i dont support premium themes (you dick monchers who releases private themes to the public, fuck off.) Enjoy!

Yes, but, they are pay themes, hence you have to pay, and they are not free. If you notice the download button on the program, that probably means the themes on themes on this program are free, so, i am not hosting the themes that are pay.

Did you mean to name this "Theme Library v2" instead of "Thread Library v2"? Nice program anyways.

ahahah, ya woops, correcting now, thankyou.

No problem. Nice program. I am thinking about making something similar, just a bit...more advanced maybe.

BUG REPORT:

Error received when trying to download Thief3. It is a 404 error, so it is probably either a mistyped URL or a missing file on the server.

I'm not impressed, it looks exactly like my program.... but mine has more features. All in all you pretty much stole my idea.

EDIT: And I have seen you make WAY better looking programs than this, it doesn't really look like you put time into it like your other releases :\

I put time into this, like a full 6-7 minutes. I released this because there currently any available, RELEASED, that is.
