Thread: [\[TuT\] DDosing Download+Tutorial \[DDos\]](#)

montage24 - September 11, 2011, 9:23 am

Hey guys, I've got another tutorial for you guys today. Lets get started!

1. Download here: [Link](#)
2. Once downloaded, open the file and run the Ddoser.
3. Now leave it on port 80 and type in the website victim's URL.

[NOTES]

Common website hosters you can use this on: [Webs.com](#)

[Smfforfree3.com](#)

[Smfnew.com](#)

If you can find any websites with poor hosting like those then your in business, companies like Hostgator and paid webhosting you will have to leave DDoser on for a couple of days, but this is useful if you want to screw someone over if there website sucks.

Feel free to comment below and please no flaming; I take no credits except for the tutorial. The DDoser is not mine and I do not take rights for making it.

Jakexx360 - September 11, 2011, 9:51 am

Doesn't open at all, unfortunately

Suhinder - September 11, 2011, 9:52 am

Yeah I think i'll wait for someone to verify this.

Seems fishy.

mdhz786 - September 11, 2011, 10:08 am

I will see first the comments or a virus scan of the file before downloading it

Acetonek - September 11, 2011, 10:39 am

Wow. Man thanks.

Regards...

VPN protectors released link: [VPN\](#)

Download it and enjoy pl0x!

a7xzeppelin95 - September 11, 2011, 11:23 pm

the question is: how much can it take. im guessing 10mbps, so gg. i can through put 4gps, good enough for me

coolmafiaboy - September 11, 2011, 11:28 pm

well i'm not sure ???

i only download trusted stuff ?

well thanks anyways ? ?

Dragon Siege - April 7, 2012, 2:39 am

No-One Download this as it is clearly infected. I knew it would be aswell judging that there is a tiny ammount of information in this thread.

preetam.kondekar - April 7, 2012, 2:43 am

yeah.. this seems to be very much infected, no way that I am gonna download this thing on my pc..

erTanHack™ - April 7, 2012, 5:57 am

Can you update the link ,This link Is exited! :)
