Thread: [Any good MyBB Themes?](#)

Prophet Banana - September 11, 2011, 2:13 pm

Does anyone know any good free myBB themes. I've looked everywhere and haven't found one I'd consider decent.

If you know any free MyBB theme providers/sites or simply a theme, please share it with me.

I create custom themes for \$15. Let me know if you're interested.

Do you have a portfolio, or any past designs?

Those are all of the free themes I've released so far. I also created my sites' current default theme but unfortunately it's currently down due to hosting issues.

<http://www.hostaff.com>

I also edit themes

I also have premium dyanxel, and nanoskinners theme.

Message me at my YM/MSN or just simply PM me here.

I'd be happy to make you a free theme. What exactly are you looking for?

I know it's tough to get clients but no need to bump a thread from 2011

My apologies, I just saw this thread at the top of the section and didn't even see the original post date.
