Thread: [\[Release\] Master Theme Repository](#)

Tedd - September 11, 2011, 4:54 pm

[img]http://www.blackhax.com/ThemeSource/logo.png[/img]

[img]http://cod3z.com/public/style_images/5_cod3zlogo.png[/img]

Coderz Logo now added to the splash screen and info tab!!

Enjoy the new theme! I worked hard on it, please discuss if you have any suggestions!!

Credits:

xZ3R0xPR0J3CTX - Advantium Theme Idea

AeonHack - ThemeBase

Someone suggested when I posted my Adobe Theme that I should make an application to contain all of the themes in a handy location. So this is what I came up with. With my theme repository application you can view all themes on hackforums from a friendly user interface. You can also download the sources to a handy .txt file anywhere you want. Previews of the themes are available BEFORE download so you can see what you are getting, and all themes sources are viewed before releasing as to stop any malicious content. The themes and data are stored on my website so there is no chance that the application could be down, or you could not be able to download a theme that you want. There will be many more additions to this application including: Premium Themes, Suggestions, Reporting Themes, Moderation, and more.

V3.5 is now out! - I added a new listbox that has never before been seen on hackforums or cod3z. Credits to Facebook_Inc for sticking with me and helping me get some of the problems out and with the virus scans!! and AeonHack for some obfuscation troubles >.> Enjoy! V3.5 will be coming out soon with ratings, and premium theme section!

Code ChangeLog:

V3.5::

- Fixed bug in "suggest" panel to automatically remove the "click to type.." text
- Added a news bar (soon to be converted to a search bar)
- Fixed repository connection error resulting in crash
- Fixed downloads, sources are now available directly from client
- Fixed pagination error, now pages work correctly
- Fixed GUI error with navigation overlaying the list of themes
- Improved GUI file (faster and smaller code)

V3.55::

- Advantium theme removed, switched to hammerfall temporarily

v4::

- New custom theme just for theme repository!!
- Minimize/Maximize button fixed!
- All new layout and colors!
- Cod3z logo added!

[img]http://www.blackhax.com/ThemeSource/thread-screenshots.png[/img]

This is the welcome screen. This will include warnings about updates (with automatic download if wanted), news, etc.

[img]http://www.blackhax.com/ThemeSource/thread-screenshot-welcome.png[/img]

This is the main screen which has the main list of themes, and soon to come: Premium Themes, Suggestions, and Search (by author, theme name, and type of theme)

[img]<http://www.blackhax.com/ThemeSource/thread-screenshot-main.png>[/img]

I have just now finished the suggestions panel and users will now be able to suggest a theme to the creators using the application. This will make it easier on you and me!

[img]<http://www.blackhax.com/ThemeSource/thread-screenshot-suggest.png>[/img]

This is the theme details screen. This has all of the details about the theme you want to download, a screenshot of the them, and a download button for the theme.

[img]<http://www.blackhax.com/ThemeSource/thread-screenshot-details.png>[/img]

NOTE: I will be going through HF vb.net and C# section to add all of the themes on hackforums, but for some reason if I miss yours and you would like to add it into my database just message me for now!

[img]<http://www.blackhax.com/ThemeSource/thread-virus.png>[/img]

Virus Scan's will be provided when the theme gets more stable. As of right now there is an average of 1 to 2 updates per day so I don't feel the need to virustotal and jotti scan every single update.

[img]<http://www.blackhax.com/ThemeSource/thread-download.png>[/img]

<http://www.blackhax.com/ThemeSource/ThemeRepository.exe>

Also note: There will be a lot of updates in the near future so don't be suprised if you start the application and it asks you to update!

?eumonic - September 11, 2011, 4:55 pm

Looks really good Tedd! I will download it and look for any bugs that may exist.

Really great job!

~Zero

Kotei - September 11, 2011, 5:14 pm

I guess I need to step up development of mine as well, to go with the new fad of the section.

Facebook Inc - September 11, 2011, 5:30 pm

Finally released it :) Good job! :D

StarZ - September 11, 2011, 6:03 pm

Nice! I like this idea.

I have a suggestion, Have a preview form where the End user can test the theme in real time.

Cherish Life - September 11, 2011, 6:07 pm

(Sep 11, 2011 06:03 PM)StarZ Wrote: [\[CITE\]](#) Nice! I like this idea.

I have a suggestion, Have a preview form where the End user can test the theme in real time. totally agree with that. Instead of screenshot, have a form already done that they can test drive.

hav0c1995 - September 11, 2011, 6:19 pm

I think it completely looks like Genuine Theme to me.

Brettly - September 11, 2011, 7:00 pm

Tedd.

If you didn't obfuscate this people will be able to get the theme your using for free...

To me it looks like HammerFall but I might be wrong so you might want to obfuscate it so your not giving away a paid theme for free.

Just a little heads up. (Btw I didn't go through the assembly I heard this from a friend.)

Tedd - September 11, 2011, 7:02 pm

(Sep 11, 2011 06:07 PM)Anatamize Wrote: [\[CITE\]](#) totally agree with that. Instead of screenshot, have a form already done that they can test drive.

The problem with that is that I would have to create a form for every single theme I add, and I would have to update the application for the user every single time I add a new theme. I could do this by downloading a seperate exe but until I learn how to RunPE or run in memory with a dynamic compiler that is probably not going to happen.

Aeonhack Archivist - September 11, 2011, 7:04 pm

Hey Tedd, I could help you with that issue really easily.

Vysse - September 11, 2011, 7:31 pm

(Sep 11, 2011 07:02 PM)Tedd Wrote: [\[CITE\]](#) The problem with that is that I would have to create a form for every single theme I add, and I would have to update the application for the user every single time I add a new theme. Tedd - September 12, 2011, 1:58 pm

(Sep 12, 2011 06:38 AM)StarZ Wrote: [\[CITE\]](#) XSilent posted an example here some time ago.

Here it is:

//REMOVED IMAGE

It will be easy to convert this to VB.NET but I must ask before I do, will this run exe's in memory?? or just dlls?

SoulZeh - September 12, 2011, 2:11 pm

this is very nice tedd bro looks like you took time on this :P bu my themelist is still sexy

Aeonhack Archivist - September 12, 2011, 2:23 pm

Well, the way I would have the themes displayed/demo'd is making a simple plugin framework and having themes apply to that plugin framework.

StarZ - September 12, 2011, 8:42 pm

(Sep 12, 2011 01:58 PM)Tedd Wrote: [\[CITE\]](#) It will be easy to convert this to VB.NET but I must ask before I do, will this run exe's in memory?? or just dlls?

It will run both, It's a simple reflection RunPE.

Tedd - September 12, 2011, 9:49 pm

Updated with version 2, some graphical enhancements along with some improvements on the code for speed, more to come REALLY soon!!!

THANK YOU FACEBOOK_INC FOR ALL YOUR HELP!!

Facebook Inc - September 12, 2011, 9:52 pm

The listbox is soo sexy, good job Tedd :)

Svarteman - September 13, 2011, 5:23 am

Thank you Tedd for adding my theme. :)

Apple - September 13, 2011, 7:55 am

Quote:The problem with that is that I would have to create a form for every single theme I add, and I would have to update the application for the user every single time I add a new theme.

Why don't you just update it dynamically then?

Tedd - September 13, 2011, 2:08 pm

(Sep 13, 2011 07:55 AM)Apple Wrote: [\[CITE\]](#) Why don't you just update it dynamically then?

What do you mean? I thought about an updater that would download the exe (from server, so always current version) on runtime and run in memory, and maybe do the same for the theme forms but I didn't want the user to have to use that much connection each time they loaded the app.

Patrickbizzle - September 14, 2011, 5:41 pm

Amazing amazing amazing Idea Tedd, Such a good project. Would looks awesome with a console! xD

Tedd - September 14, 2011, 9:41 pm

LOL, did i read obfuscated.

Glad you decided to protect it buddy, It's defiantly a project worth keeping protected :)

The updates are coming on nicely and can't wait for the premium stuff to be added..

I hope at some point you will implement being able to buy the themes from your software (very handy) saves searching tons of threads :P

Anyway i wish you the very best for this project and your good self! :P

6e756c6c - September 15, 2011, 2:02 am

You need to work on the contrast a bit, specifically on the 'themes' and 'suggest' tabs. It's a bit hard on the eyes. :(

SoulZeh - September 15, 2011, 5:04 am

Nice program Tedd, i added this to my theme list..

Tedd - September 15, 2011, 5:27 am

On my screen it is pretty bright, but this could be different if I (or you) have different screen brightness, luminosity, etc. due to manufacture or user settings. I have been wanting to switch to a white theme but I haven't found one. I would love to use yours but I can't afford it.

Anyway i wish you the very best for this project and your good self! :P Yes I finally decided to obfuscate it. Luckily before I introduced the new listbox control. but the only reason I didn't before is because my obfuscater ran out the day before, but I just bought an extended trial.

(Sep 15, 2011 05:04 AM)SoulZeh Wrote: [\[CITE\]](#) Nice program Tedd, i added this to my theme list.. Thank you, I will probably be going to your thread and adding all of those themes as well. I will put you in the credits definitely for helping out.

(Sep 11, 2011 07:00 PM)Brettly Wrote: [\[CITE\]](#) Tedd.

To me it looks like HammerFall but I might be wrong so you might want to obfuscate it so your not giving away a paid theme for free.

Just a little heads up. (Btw I didn't go through the assembly I heard this from a friend.) This is a late reply but yes I know this. And yes, this was the hammerfall theme just modified to look like xZER0xPROJ3CTx's advantium theme.

?eumonic - September 15, 2011, 5:29 am

(Sep 15, 2011 05:27 AM)Tedd Wrote: [\[CITE\]](#) On my screen it is pretty bright, but this could be different if I (or you) have different screen brightness, luminosity, etc. due to manufacture or user settings. Why not modify Advantium to be white? If you want, I can even do it for you.

~Zero

Snowboy7 - September 15, 2011, 5:54 am

This was just sweet! :D Very good theme. Keep up mate!

50GTB - September 15, 2011, 12:42 pm

Can i have my theme added to it please?

Name: Brick

(Sep 20, 2011 08:59 AM)sercankd Wrote: [\[CITE\]](#) unable to download. fix your broken link. It's not broken, I just tried it. Maybe your internet is messed up?

Patrickbizzle - September 22, 2011, 7:39 am

Tedd.. I LOVE THE THEME DUDE! Ill be using this later on for sure! <3

Cherish Life - September 22, 2011, 1:59 pm

Hey dude nice!! =D I hope more themes are added, nice job so far =)

zehaha - March 30, 2012, 1:18 pm

Doesn't work for me, is your server down?

aTastyUnicorn - March 30, 2012, 2:05 pm

Really nice Project and release.

i love it

123max - April 7, 2012, 10:57 am

Not working anymore! needs update!!!!
plz update it!!!

Les Frères - April 14, 2012, 6:08 pm

When i run the exe file, nothing happens. please update :)

Kenny252 - April 14, 2012, 7:44 pm

Are you having the application connect to a server or is it hard-coded inside the app. If its directly in the app you should make it connect to a database or website so it's easier to update the list without having to download an executable.

Vicious????? - April 16, 2012, 9:48 am

This is the best thing ever, serious, i just downloaded all of them, want me to upload to mediafire so you dont have to go through them all?

Call Me Maybe - April 16, 2012, 9:58 am

Its very sexy, great contribution. Keep it up bro!

beho86 - April 16, 2012, 11:56 am

umm For some reason the app doesn't even open!!! I tried to open it several times, with no luck.

Trolly - April 16, 2012, 12:06 pm

I am running Windows 8, and it says that it Stopped working.
Strange...

Redeemz - April 16, 2012, 12:08 pm

(Apr 16, 2012 12:06 PM)Trolly Wrote: [\[CITE\]](#) I am running Windows 8, and it says that it Stopped working.

lol, why are you running windows 8...?

remmaz - April 29, 2012, 1:34 am

Looks Amazing! great work tedd and aeonhack, this is by far the best looking program I have seen :)

Downloading right now and great work creating it, will make adding themes alot easier and at my finger tips :)

keep up the good work guys

Thanks ?

P.S the first img is broken, also I look forward to see some new themes to come out :)

thanks

EDIT: I am getting the same problem? It comes up with an error when i try open it? please fix

thanks

MistaCode - April 29, 2012, 4:14 am

it wont work for me? i get error all time! please help

lrunfrompigs - May 1, 2012, 8:25 pm

App never opens, please update thanks!

dlwhdrif - May 2, 2012, 8:22 pm

application failed to connect to database server, please try again later!

:O why do I get this

Stress - May 2, 2012, 8:59 pm

Really nice job man, I love it. :]

Barthelemy - May 9, 2013, 3:18 am

It doesn't work for me, i ran it as admin, i see the process in the taskmanager but it stops after launching it...

I'm running on windows 7

Any idea :/

Thanks

PS: It look awesome

?Mephobia - May 9, 2013, 3:19 am

Maybe it doesnt work because of how old this thread is, and how you should not be gravedigging it. Clearly the servers are not up and running anymore.

0fd52785afa06f3192e876cd1 - May 9, 2013, 4:35 am

(May 9, 2013 03:18 AM)Barthelemy Wrote: [\[CITE\]](#) It doesn't work for me, i ran it as admin, i see the process in the taskmanager but it stops after launching it...

Thanks

PS: It look awesome

That's because the CodeVeil packer the op used has corrupted the exe.

You can unpack it via de4dot and then it'll work.

Venom? - June 18, 2013, 8:25 am

This doesn't open on my computer :(is this still up?

NETExplorer - June 18, 2013, 10:19 am

(Jun 18, 2013 08:25 AM)Venom? Wrote: [\[CITE\]](#) This doesn't open on my computer :(is this still up?
THIS WAS 2 YEARS AGO.

Use Themebay!
