For the past 2 weeks I've been visiting many Hacking Sites searching for Facebook Account Method, Well i found some method but they only work if you don't take some extra precautions. I searched for those method so i can make a security tutorial for the innocent ones out there whose accounts are being hijacked for Spamming and use for other illegal reasons.

Now let me tell you how they exploit your accounts, Well the working method is that adding a extra email to your Facebook account and then retrieving it by using the "Forget My Password" panel on the Log-In page. Let me show you how that appears when you do it in real:

[img]http://3.bp.blogspot.com/-NjBOnfCG7g0/TifCYJBVHxI/AABI/OAZ6JkLsOJg/s400/Weakness.png[/img]

Now as you can see in the picture above that the Intruder can easily add a new email to the victim's account to get the Password Renewal Link then he can change the password and control your account after 24 Hour Lock down which is Facebook's standard Password Renewal Procedure.

Now in order to avoid this intrusion follow these simple steps:

Download Txt File :

Code <http://adf.ly/2lv9O>

[img]http://1.bp.blogspot.com/-VfOAYrPY_MU/TifJJ5qAKKI/AABM/2KNitt6qArU/s400/Facebook+Security.png[/img]

Enabling "Cell Alert" is the most important security measure you want to take as it alerts you about logins to your account. After following the above steps i guarantee you your account can be safe not 100% safe for that you would have to make yourself completely invisible.

Now I'll describe the overview about what will happen when a intruder will hack your account, He will add a email to your account then change the password and then pass the 24 Hour LockDown. When he will login into your account will have to enter the code which Facebook will send to the Victim's Mobile alerting him that someone is trying to access his/her account. The Intruder cannot change the mobile no. so unless he enters the code which FB sent to the cell, He's a EPIC FAIL :D

I'll try to make a more secure part 2 for account security till then enjoy Failing the attempts of many intruders. Cheerios
