Thread: [SellMyChannel.net - Classifieds](#)

Cliché - September 17, 2011, 3:06 pm

I would like to get some feedback on my current project in which I am currently working on and would like to know from other people how it's structure is.

I worked a lot in making the system work and structure.

It's a classified ads website for selling/buying YouTube Channels or any other related products or services.

Please check the site out www.SellMyChannel.net

If you are experienced and would like to help me with this project please contact me.

I am also working on a different project "Hosting company" which I have \$500 Already and brought a dedicated server,domain,ssl,whmcs and constructed the php theme which I'm hoping to start using HackForums to sell my services.

Looks messy, Alot of things all over the place kinda overwhelms me and makes me lost in what to look for.

It doesn't look like a website for youtube channels either, the theme should be changed to look more appealing along with a new logo.
