Thread: [How to put lyrics on songs\(nonjailbroken\)](#)

Alside - September 17, 2011, 3:15 pm

Ok for the longest time(a long time ago) I had wanted to put lyrics on my ipod.
so here is my tut to any of you on how to do it.

- 1.Go to Itunes on the computer and find the song you want to get the lyrics for.
- 2.Go to google and serch for the lyrics of your song, once found copy them.
3. Right click on the song in itunes and click get info then one of the options is lyrics click it.
4. past it in there
- 5.sync
- 6.click that song on your iPod/iPhone and the lyrics should show if not click you album cover and they will show

hope this helps anyone that needs it

Or,Or,Or

you could just search up lyrics in the appstore and BAM..there's an app that will fetch the lyrics.

I suppose he means what you posted is unoriginal. One can simply use Google to find this information, if this isn't already common knowledge.

Grin - September 18, 2011, 3:00 pm

Yes agreed with Don and Paradoxum. The tutorials or not too LQ but they are quite useless. It's mostly common knowledge, but we would appreciate it if you researched the more special tweaks, mods, and tutorials.

There are plenty of apps, jailbroken/nonjailbroken that will do this job. And plus I'm pretty sure that most iDevice users know how that there are lyrics apps in the app store.
