This site is pretty legit. I've received many rewards from it including:

Minecraft Code x2

Godaddy - \$20 worth of gift cards

And around \$10 Paypal cash.

You complete offers for either cash or points. Cash can be paid out at \$5, or converted into points to be used for gift cards, or other rewards. Doing the daily surveys each day will give you \$1, plus around another \$2 of easy registrations if you change your ip every 24 hours.

Proof of payout would be nice. Thanks.

Esteem - September 18, 2011, 1:58 am

I got the payments a while ago. I've only just started being active again. Once I get paid, I'll post proof. I just need a couple more points to have enough for a giftcard with enough for a .net domain on it :)
