How to get high anonymity proxy for free

Hello hackforums ! In this tutorial I will teach you how to get High anonanonymity proxy for free. Ok lets start.

Things we will need:

- some Proxy leechers
- Charon

I have uploaded all these so you don't have to search. Pack include: Proxy Finder Enterprise, p0iz0nProxyProcessor, Proxy-Leacher-Pro, Proxy_Leecher_6.5

-Download link: [DL Link - Mediafire](#)

Password is (remove the space): Code hak forums.netIf you have problems visit this link to see password: [Link to the password](#)

First we open Proxy Finder Enterprise and click Find in upper left corner to leech proxies

Image:

[img]http://img40.imageshack.us/img40/5436/qweqeg.jpg[/img]

After that we click save and save leeched proxies in .txt format. Also we can use Proxy Leecher and Proxy Leecher Pro, We open it and Click Start (for Proxy Leecher) and Leech (P.L.Pro) and then save that proxies.

Picture:

[img]http://img710.imageshack.us/img710/6559/leecers.jpg[/img]

We can use ProxyProcessor too

[img]http://img192.imageshack.us/img192/6005/3ppp.gif[/img]

After that select all proxies you leeched and save it into the one .txt file. It's time to set Charon. We focus on Options which are on left side in program.

[img]http://img20.imageshack.us/img20/3017/charonpodesavanja.jpg[/img]

After that you click on Judge options and paste this:

Code <http://alltraders.ru/azenv.php>

<http://chilly.ch.ohost.de/aze/azenv.php>

<http://mini-order.org/pxj/azenv.php>

<http://www.ingosander.net/azenv.php>

<http://www.matchav.com/deny2/azenv.php>

<http://www.scifi.pages.at/x-paradox/azenv.php>

<http://dressedtoimpress.dr.funpic.de/pj/azenv.php>

<http://members.multimania.nl/proxyworld31/azenv.php>

<http://proxyjudge.hell-spy.de/>
<http://snah667667.sn.funpic.de/judge/azenv.php>
<http://wfuchs.de/azenv.php>
<http://www.useractive.net/proxy/azenv.php>
<http://utenti.multimania.it/bingo/azenv.php>

Then click on Test Judges and after the test is finish click on Delete all bad[color]

[img]<http://img148.imageshack.us/img148/4059/judgesz.jpg>[img]

After that we load all proxies wait little to Charon load all proxies and then click on Check Proxies and then "Check anonymity of all proxies" After the program will check all proxies then we click on Filter proxies and we Filter all dodgy/duplicates/gateways and most important we Delete all Non-anon (Non anonymous)

Image: [url=<http://img198.imageshack.us/img198/415/krajn.jpg>]

Now follow these:

[img]<http://img198.imageshack.us/img198/415/krajn.jpg>[img]

And that would be it, now we only save our Anonymous proxies clicking on floppy disk icon in charon.

I hope you enjoyed

berzerk - September 18, 2011, 6:00 am

Thanks for the tut, it's very imformative and also for the tools.

Arrakis - September 18, 2011, 7:51 am

very nice tutorial, well made. I also liked that GIF you had.

Dimitrije - September 18, 2011, 8:45 am

Thank you all, I am really glad that there is somebody which can have some benefit from my tutorial.

stullko - October 7, 2011, 6:09 am

Great tutorial, thanks for that.. but charon is very old software :(

dxspeedy - October 7, 2011, 7:37 am

Bro link deleted? can u update the file please?

Zhen. - October 7, 2011, 7:57 am

This is a very informative tutorial mate.

However, the link to the tools seems to have been broken down already.

Please fix this as soon as you can and keep up the good work (Y)

-Zerofreak

jithinsmmb - October 7, 2011, 8:06 am

very nice tutorial, good work...enjoyed

Moghul - October 7, 2011, 8:39 am

File deleted error!

please fix that

Thanks!!!

Dimitrije - October 7, 2011, 10:36 am

DOWNLOAD LINK WORKING AGAIN

Sorry for the download link, I have updated files but forgot to change the DL link. I have mediafire account so my files will never be deleted.

PS: chanor is maybe old software but this is the newest version and with this you can get 100% FREE anonymous proxies. If you want to use some new software you will have to pay for it and you will get same proxies cuz every proxy checker must use Judges.

Legendwnz - October 7, 2011, 3:35 pm

Very nice tutorial though I have a question

Is there any program to import these proxies through firefox?

Esc - October 7, 2011, 4:30 pm

Nice TuT bro i might use this, Keep up the good work

Dimitrije - October 8, 2011, 12:40 am

If you want to know how to import proxies in firefox read this:

<http://technicalbliss.blogspot.com/2007/04/how-to-use-free-proxy-with-firefox.html>

Thanks I think this is very usefull

S1GN - October 9, 2011, 6:45 am

Is there a way to import the complete txt to firefox or chrome ? so i could change them as i like

Dimitrije - October 26, 2011, 10:48 am

Yes of course, open firefox>options>advanced>network tab>settings and there set the proxy!

Maxitj - October 26, 2011, 12:14 pm

Just what I was looking for, thanks for files also for tutorial

P??sonl?af - October 26, 2011, 1:01 pm

Nice tutorial and all just one problem.

if you don't buy the program you can't save the proxies you leeched.

sha89 - October 26, 2011, 1:29 pm

ive followed this but what do i do to get the procky to work to change my ip ??

Dimitrije - October 27, 2011, 10:41 am

if you don't buy the program you can't save the proxies you leeched.

No that is not true. The program I gave you in download pack works and you can save proxies you leeched.

osiris.teste - October 27, 2011, 5:07 pm

Even using one of this proxys it is also possible that someone asks for a log and gets our original IP .. no?

Kompleet - October 27, 2011, 5:47 pm

Thanks for the tut! Very detailed and concise.

Dimitrije - October 28, 2011, 4:42 am

(Oct 27, 2011 05:07 PM)osiris.teste Wrote: [\[CITE\]](#) Even using one of this proxys it is also possible that someone asks for a log and gets our original IP .. no?

No it is not possible to see your real IP adress if you use this L1 proxies you leech

osiris.teste - October 28, 2011, 12:51 pm

But this is only for browsers, right?

How can I hide my IP when accessing a server computer with a RAT?

If I create an email in google in a browser using a L1 Proxy my IP will still remain anonymous right?

Another thing,

in Charon, everytime I re-check for anonymity the program reduces me the list of Anonymous proxys lol.

I started with like 20 anon proxys and I'm now at 7 ..

Dimitrije - October 29, 2011, 3:44 am

Lol man I see that you don't know what are you talking about. This are proxies and you can use them in browsers and in programs too, just find in program settings proxy and paste the one you have. As for the anonymity proxies they are expiring and you can't expect that you can use one proxy for over a year. If you don't like it and don't need high anoymous proxies then go away from my thread. There is so many people that thanked me for this only you are not satisfied.

Alligator - October 29, 2011, 10:13 am

Dude I can't run the programs you provided on Windows 7 :(

Dimitrije - October 30, 2011, 1:06 am

(Oct 29, 2011 10:13 AM)Alligator Wrote: [\[CITE\]](#) Dude I can't run the programs you provided on Windows 7 :(

I am using Windows 7 Ultimate x64 and it works perfectly, if you wanna I will show you over TV that it is working on my win 7

Scooby Doo. - November 26, 2011, 8:06 pm

This tutorial is amazing, beyond beneficial.

Thanks for the share bro, I'd rep you if i could..=(

saisrujan - November 26, 2011, 10:13 pm

very informative tut thank u

tools are nice

it would be very glad if u give the registration code for proxy finder

\$pooky - November 26, 2011, 11:12 pm

nice tutorial bro and thanks for the tools..

SIM-947411 - November 27, 2011, 2:47 am

Thanks for the tut, it's very imformative and also for the tools.

kyl - December 4, 2011, 3:00 am

very nice tutorial! will be useful... thank you!

Dimitrije - December 4, 2011, 8:36 am

I am glad that you found it usefull.

Hypnotic961 - December 16, 2011, 4:37 pm

Incorect password. Pokusao sam ovaj pw ali nije kucao sam i rucno i copy paste.. Code

sifra je

Code hak forums.net (Moj forum) samo obrisi razmak.

Bosku - December 17, 2011, 2:17 am

Hello,

Thanks for sharing this great tutorial!

google2012 - December 17, 2011, 2:27 am

very nice tutorial, good work..Thank You

camelhump - January 8, 2012, 11:33 pm

I cannot get Proxy leacher Pro or Proxy leacher 6.5 to work????

When I extract the files out of the zip and go to click on them i get this
error message??

"Component 'mswinsck.ocx' or one of its dependencies not correctly registered: a file is missing or
invalid"

What can I do here?? Charon works fine though??

Thanks in advance for any help:)[/align]

Dimitrije - January 9, 2012, 1:42 am

That error is normal because you don't have that component installed on your PC. Google for 'mswinsck.ocx' download and when you download it to C:/Windows/System32 if you are using x86 system or to C:/Windows/SysWow64 if you use x64 bit system. Then open command prompt and navigate to System32/SysWow64 folder using cd command and write this regsvr32 mswinsck.ocx And that's it. Now try to open program. You will probably get few more errors like this just follow steps for other .ocx files.

HanButler - July 5, 2013, 11:41 am

Great job with the pics. Tutorial over all was just what I needed right now. thanks Dimitrije
