Thread: [\[iNFO\] Cool Tweaks\[iNFO\]](#)

Døñ - September 19, 2011, 8:12 pm

Want 3 Cool tweaks?

Try these!

Live Clock:

[img]http://www.cutviews.com/wp-content/uploads/2010/10/iPhone-Clock.png[/img]

What is it?: Live clock changes the clock icon on your iDevice to make it a working clock, yes its the actual time.

Is it useful?: Its not useful to say, buts its cool to show off :D

How do I get it?: Go on Cydia, then Search "Live Clock" its free from the BigBoss repo.

Live Weather:

[img]http://ikwong.sytes.net:88/wordpress/wp-content/uploads/2010/03/weathericons.png[/img]

What is it?: Just like Live Clock, it changes your Weather icon into a live weather.

How does it work?:

By choosing your Location from the weather app, set your location to be the first weather page and it will take that info and put it on your icon. Also go into Settings>Live Weather and see more things to do!

Is it useful?: Heck YEAH!, I dont ever launch the weather app anymore since using Live Weather xD

Where can I get it?: It is also available on Cydia under the BigBoss repo!

Music Icon:

[img]http://aux2.iconpedia.net/uploads/357498668.png[/img]

What is it?: It makes your Music/iPod icon interactive. 1 touch will play and another will pause the music. You have to hold the icon to launch the app though.

Is it useful?: Yes, I love it when I dont want to open the whole app to stop or play the music.

How do I get it?:It is available in Cydia under the insanelyi.com repo (repo.insanelyi.com)

I have heard of all three. Quite new. And to me the music one is the most useful. Thanks.

typoerased - November 7, 2011, 7:06 am

I have the clock and music one..The weather never seemed to appeal to me but thanks.

Sparkfear - November 7, 2011, 9:09 am

I'm going to install the music 1.

Because maybe the clock looks cool but it's kinda useless imo.

Thanks for the heads up.

PATEL - November 8, 2011, 11:03 pm

thanks don..????
