Thread: [\(\(\(FREE VPN for ALL\)\)\) Limited Time](#)

Nestle* - September 22, 2011, 10:45 am

Hello There,

I found a guide to setup a free VPN. Very Simple steps to Follow.

1: Send an email to promotion@vpnod.com with subject vpngod

and you will get an instant reply with access credentials to VPNOD service.

2: Now go to Control Panel.

3: Then open Network and Sharing Center.

4: Now Click on Setup a New Connection.

5: Then Click on Connect to a Work Place.

6: Select Use my Internet Connection (VPN)

[img]http://vpnod.com/site_media/static/images/windows/vista_pptp_4.png[/img]

7: In the Internet Address: field, type vpn.vpngod.com

[img]http://vpnod.com/site_media/static/images/windows/vista_pptp_5.png[/img]

8: In the Destination Name: field, type VPNOD.

9: In the User Name: field, type your VPNOD username. Your VPNOD username which was sent to you earlier in an email.

10: Click the Create button and then click the Close button.

And you're done

This does work. However every time I connect I keep getting error 651.

EDIT: 999 posts. :)
