Thread: [I found this hash in a sam file saved in my pc using cain and abel](#)

Valour - October 31, 2009, 9:02 pm

820774cfa9ed52bae5df3cc938898205

i dunno what hash it is

i tried to decrypt it using md5 decrypter in cain and abel but it says its gonna take 436 years !!!!1
even my life is not soooo long !

lol

so if anyone could help me crack this hash please post here

thnxx in advance to all those who r going to help

TZ- - October 31, 2009, 9:22 pm

if is your computer, you should know what is the password. In sam file are stored usernames and passwords from local machine. If you have somebody's hashes, try to crack with this tool

<http://www.insidepro.com/eng/saminside.shtml>

Valour - October 31, 2009, 9:27 pm

yea

its someone elses password on my pc

its actually from one of my network computers

but i have cain and abel and i have hash type identifier which told me that it is md5

i think its a password of some website stored

anyways

please do it

i m just got bored

i was searching for this hash cracker from sooo long .

if you find one just give it to me

TZ- - October 31, 2009, 9:34 pm

I will not crack for you or anybody else on this site anymore. Use this

<https://hackforums.net/showthread.php?tid=156819>

To see effectiveness of the program visit forum insidepro.com , hashkiller.com , freerainbowtables.com ... and under searching for TZ- you'll find hundreds and thousands cracked passwords daily, just from me.

not to mention "open crack" modules and no-name cracked passwords.

Bro, this thread is 11 years old

Don't dig up old threads

Make sentences, I'm not a dog

Besides you answer to a member who is not active anymore, what's the value of that ?

I've just copied and pasted the hash on Google, got the password, your intervention is useless

account_ - August 19, 2020, 7:42 am

And your reply to this thread is, why not just ignore the thread.

(Aug 18, 2020 04:23 PM)webdev77 Wrote: [\[CITE\]](#) Join date: yesterday. We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

A perfectly acceptable bump as it solves the problem at hand.

The value is the hash is now cracked and indexed so anyone else on the planet can see it. Posting on old threads is not a policy violation provided posts are on topic and not of suspect quality.
