This is my first time selling on HF, so work with me here?

I'm selling the bot from YouLikeHits.com which costs \$30 for half the price at \$15. The bot is fully functioning, and definitely the best bot for YouLikeHits you can find. Believe me, I know there are some other free alternatives out there, I've tried them, and nothing works as well as this one.

For those of you familiar with YouLikeHits, you should know that you can easily get hundreds in a month with minimal amount of work using a bot. I'm not going to go into the specific method, but it's not hard to figure it out. Most people would know what I'm talking about. Anyways, my point is that you can make the bot's money in no time. I'm currently running it too as a matter of fact.

I will only go first with members who have over 30 rep and are UB3R or L33T. Anyone else, don't bother asking me to go first, I will not. I've had plenty of bad experiences on other websites. I know I don't seem very trustworthy either, but if you don't like it don't buy it. For those who meet the criteria, I'm more than happy to go first.

Post here and PM me. If you only PM me I will not respond to your message.
