HOW TO FIND IN THE WEB, MAILS TO SPAMMMMMMMMM!!!! TUT BY msuper28!

?

Hi to all friends here italian guy, today i'll show my own tutorial and i'll go to show you how to find in google mails for spam or advertise your website!!!! It's simple but cool!!!!

First thanks to pacninja and google. Sorry for my english.

I'll show you many examples here.

Well for first you need a mail exctrator that's free thanks to pacninja for program, and if you search on google you can find the source in vb.net too for make your own.

Well you can download here pacmail extractor without virus: ?

<http://www.mediafire.com/download.php?ydwoytjqo4y>

it will extract your mails from a text...

then, search on google for mails like to:

"guestbook.asp"

here you can find a guestbook.asp that there are sometimes lots of mails list...

see

i've found one but there are a few mails... ? but don't worry

[img]http://i36.[censored].com/s17xjt.jpg[/img]

if you use firefox click view source and copy all source.

now open pac mail extractor and paste the source and click go you will get the mails!!

See as this:

[img]http://i33.[censored].com/au8vom.jpg[/img]

You see the mail are in html code you can manipulate them by clicking save and modify after in worpad. You will see the out worpad file in pac mail directory.

I'm in guestbook.asp page too and i can add html injector code and i'll have look like this:

[img]http://i37.[censored].com/2j50w1k.jpg[/img]

Now it's amazing and cool!!

The html injector code: <http://www.mediafire.com/download.php?wemz3jnwrtz>

So, Yo i'm lazy and i wanted full good mail list see how to get now. ?

Now i'll go to my fucking president's homepage (of berlusconi...) there are lots of mails update daily...

I'll go here: <http://silvioberlusconispa.myblog.it/>

I'll select all and i'll send all text to pacmail click go and done! Lots of mails in less second!!
See:

[img][http://i38.\[censored\].com/2wqaesm.jpg](http://i38.[censored].com/2wqaesm.jpg)[img] ?

Now i can go to spam all mails!! There are lots of methods to do this!! Enjoy!!

Try ever to find mails through google, search for guestbook.asp popular forum/blog your president's homepage (i'll hope that you can be good not as my-berlusconi-) and other!!

The web there're too many mails list to spam!! Enjoy!!

Now you need only a spam tool, i'd recommended you a spammer like php spammer that you need only php spammer source to upload on free webhost! Or you can find one on website likes fake mailer and other that usually are anonymus.

Some spam tools:

<http://fakemailer.net/>

GOOD FREE WEB HOST: <http://www.blackapplehost.com> (support php)

GOOD LINK PROTECTOR (if you use mails for pishing): <http://www.link-protector.com/>

GOOD SITE FOR FAKE MAIL(anonymus for pishing and spam):

<http://www.soom.cz/index.php?name=pro...>

<https://hackforums.net/showthread.php?tid=175242&highlight=mail+spammer>

<https://hackforums.net/showthread.php?tid=171741&highlight=mail+spammer>

<https://hackforums.net/showthread.php?tid=171197&highlight=mail+spammer>

finally you can make your own mail bomber in vb6 or vb.net!

I'm done with my tutorial it's very simple to do, i'll hope that u liked this tutorial wrote by me.

See you soon with nex tutorial! Bye!

Note: you can share this guide but say thanks to me when you post on other forum for the guide please! Thanks! ?
