Thread: [How to Jail Break and Downgrade iPod's, iPhone's and iPad's](#)

Morchid - September 25, 2011, 6:10 pm

[img]<http://i.min.us/iemiwi.png>[img]

You must have iTunes to do all the things below

iTunes is a free download which can be found here: <http://www.apple.com/itunes/download/>

Green Pois0n : <http://greenpois0n.com>

Quick Pwn : <http://www.quickpwn.com/>

Black Ra1n : <http://blackra1n.com/>

Sn0wbreeze : <http://ih8sn0w.com/>

Redsn0w : <http://www.redsn0w.us/>

Spirit Jailbreak : <http://spiritjb.com/>

Jailbreak me : <http://www.jailbreakme.com> (Access from I device) Tiny Umbrella : <http://thefirmwareumbrella.blogspot.com/> (kick idevice out of DFU/recovery mode)

Jailbreaking is basically modifying the idevice's firmware which allows you to do alot with your phone. When you Jailbreak your idevice it allows you to download themes/music/games and alot of paid content for free.

I did this tutorial for QuickPwn, it's pretty much the same thing for all them all the other jailbreak programs.

If you get an error message, Google the solution. There are way to many error messages so i'm not going to post them.

If your idevice freeze in DFU/recovery mode use tinyumbrella to kick it out of that mode.

Step 1:

Connect your idevice to itunes

Step 2:

Click on QuickPwn and click run. Click the blue forward arrow, Read all the stuff then agree

Step 3:

At the top right select the firmware which your idevice is on

Step 4:

When the blue check appears click it, Top left there should be Cydia tick it so there is a check mark beside it

Step 5:

Now you need to put your idevice in DFU mode(look below), DO NOT UNPLUG YOUR IDEVICE

Step 6:

It should start to jailbreak, please wait. Might take a few minutes

Step 7:

If your idevice apple log freeze open itunes and give it a few minutes. That should fix it

Step 8:

Your idevice should now reset and have Cydia on the second page

And there it is your jail broken idevice, hope you enjoyed the tutorial. If you have any question or and feed back feel free to post on this thread

[Video: <http://www.youtube.com/watch?v=MnZIOk90TAY>]

Step:1

Download the firmware file which you want to downgrade your idevice to.

Note:

Please download the firmware version which your idevice can be jailbroken to. Firmwares can be found here <http://www.felixbruns.de/iPod/firmware/>

Step:2

Download it to your desktop so it is easy to find.

Step:3

Connect your idevice to your computer, you must have itunes download on your PC

Step:4

You must now have your idevice in DFU mode.(tut can be found below)

Step:5

Once your idevice is in DFU something will pop on your screen saying idevice found in recovery mode.

Step:6

When it says that hold control and press restore, a little window will pop asking you what fireware you would like to use. Select the fireware which you wanna downgrade your idevice to.

Step:7

Now you will have to wait for your idevice to downgrade.

Step:8

Now your all done, once its done downgrade your idevice should restart automaticly.

Hope you guys enjoy this little tutorial on how to downgrade your idevice

If you need any help with this feel free to private message me.

Where all custom firmwares can be found

<http://www.felixbruns.de/iPod/firmware/> The Power button is on the top right of the I device and the Home button is in the center middle of the device

Home button: Green Power button: Blue

Step 1

Connect your idevice to the computer and open up iTunes.

Step 2

Hold down the power button for 2 seconds

Step 3

After the 2 seconds is up, hold down the home button along with the power button for 10 seconds exactly.

Step 4

After the ten seconds, release the power button and continue holding the home button until your computer makes a noise and iTunes says that your idevice is now in recovery mode

If you do not understand the guide above, watch the video below

[Video:

I am not the the creator of this video

If you need any sort of help with jail breaking or downgrading your idevice feel free private message me. For a small price I could jail break or downgrade your idevice via Teamviewer. If you would like me to jailbreak or downgrade your idevices feel free to Pm. I'll do the first few jail break and downgrades for FREE!

This looks awesome, very detailed and well done :).

Dread Pirate Roberts - September 27, 2011, 5:36 pm

I wish my iPhone could be jailbroken.

Morchid - September 27, 2011, 5:37 pm

(Sep 27, 2011 05:36 PM)alabama Wrote: [\[CITE\]](#) I wish my iPhone could be jailbroken.

It can be if you follow the steps above :)

I've jail broken several iPhone before.

Breakbeat Junkie - September 27, 2011, 6:09 pm

This is a very HQ tutorial. But, the current 4.3.5 can't be downgraded to 4.3.3 with that method.

Morchid - September 27, 2011, 6:13 pm

(Sep 27, 2011 06:09 PM)?eborn Wrote: [\[CITE\]](#) This is a very HQ tutorial. But, the current 4.3.5 can't be downgraded to 4.3.3 with that method.

4.3.5 is for Ipad 2. Correct me if i'm wrong.

Grin - September 27, 2011, 6:49 pm

Hey buddy. Refer to Dexus my friend he will help to add this to important tutorials of idevices.

Morchid - September 27, 2011, 7:22 pm

Please tell him to contact me :)

I'm about to go to sleep.

Eminent - September 27, 2011, 7:38 pm

Very great guide, Morchid! This guide actually helped me downgrade, after I was an idiot and lost my jailbreak from updating.

Døñ - September 27, 2011, 8:14 pm

I was wrong on how this thread was going to turn out. I apologize. Also 4.3.5 is for all iDevices (NON CDMA)

AnthonyWasH3r3 - September 27, 2011, 8:18 pm

Nice guide.

The official sn0wbreeze site can be found here though; <http://ih8sn0w.com/>

Also, might want to add that you almost always need to have your SHSH blobs backed up before you can downgrade.

Morchid - September 28, 2011, 4:29 am

I've added snow breeze but I've never used SHSH blobs before. Do you think you can write me a little guide so I can post it at the bottom.

Grin - September 28, 2011, 6:13 am

No need. There has already been a few tut on blobs anyhoo.

Breakbeat Junkie - September 28, 2011, 6:29 am

Oh, I'm confused sorry. :)
I should add the SHSH blobs to this guide to make it an unlimited resource.

D3xus - September 28, 2011, 9:45 am

HQ. One of the best tuts I've seen around. :victiore: You earn my gratz!

Morchid - September 28, 2011, 12:19 pm

Thanks for the feed back :)
I really appreciated it. If you would like me to add something pm me :)

Xirian - September 28, 2011, 1:18 pm

Very nice guide mate, this would deserve a sticky! ?

wbjunky - September 28, 2011, 9:54 pm

Really well and clearly written guide, I bet this will help out a lot of guys who are new to jailbreaking.
By the way, this is for everyone, what is your favorite program for jailbreaking?
Mine is redsn0w.

-Max?

Morchid - September 29, 2011, 4:22 am

Thanks. When I get another idevice i'll make a video of me jail breaking it :)

Hazurd - September 29, 2011, 12:56 pm

Nice guide. This is very detailed, good job. I usually just use Jailbreak me but this may come in handy later.

Grin - September 29, 2011, 2:35 pm

Favorite jailbreak tool?

I'd have to say blackra1n.

Not because it's the easiest jailbreak, that's not quite true when compared to star. But blackra1n has many benefits when it comes to jailbreaking. One of them being if Cydia is ever problematic, you can uninstall it using Cydia (the only way that is safe) and then reinstall it using blackra1n. Limera1n that's always been unstable, but I guess it grabs my attention as well.

Morchid - September 29, 2011, 2:40 pm

Limera1n that's always been unstable, but I guess it grabs my attention as well. When I try to use blackra1n it u sally comes up and starts to say not responding. I rather use quickpwn or snow breeze.

Grin - September 29, 2011, 2:43 pm

Agh! I. Found one mistake.

Just one small one. Let's say you download tiny umbrella which I have. It only can enter, exit, fix recovery mode. It is different from DFU. Just wanted to let you know that. Some newbz may have some problem downgrading to custom firmware or jailbreaking with greenpoison.

I say that because you will get shit tons of errors on iTunes if you are downgrading w/o DFU.

Just to let you know. Anyways good tutorial.

(Sep 29, 2011 02:40 PM)Morchid Wrote: [\[CITE\]](#) When I try to use blackra1n it u sally comes up and starts to say not responding. I rather use quickpwn or snow breeze.

That has never happened to me. Also, blackra1n doesn't take a whole lot to run. I like blackra1n also because it's not a bitch about connectivity. My computer<-- the directory and iTunes are linked up. If iTunes says... Cannot detect I-- I just run blackra1n to enter it to recovery and blackra1n works as an alternative to tiny umbrella. To exit recovery all that is needed is to unplug and wait for the iPod to auto reboot.

D3xus - September 29, 2011, 4:09 pm

For the blackra1n freezing up problem, you need to download blackbreeze to fix it.

iMario - September 29, 2011, 4:25 pm

I'm going to read the downgrading guide since I never knew how to downgrade :P Thanks for this thread.

Flo Rida - September 30, 2011, 1:01 pm

Thanks for the share man! Came in really helpfull!

Prominent - September 30, 2011, 1:07 pm

Huge for Morchid, this is very detailed and should be seen by more people :)

Happeh - September 30, 2011, 1:20 pm

Really good guide. I will be using this if I ever want to JB my iPhone again.

Morchid - September 30, 2011, 4:39 pm

Oh thanks, what kind of ipod are you jail breaking?

Name Brand - October 2, 2011, 1:54 am

fucking best tut ever. i jizzed =-/

Alienguy - October 2, 2011, 2:59 am

Awesome tutorial , very detailed and well done :).

iRun - October 3, 2011, 3:37 am

You should add what Jailbreak programs work with an iOS. For example Greenpois0n works with 4.1, 4.2.1, nothing else.

Morchid - *October 6, 2011, 2:44 pm*

(Oct 3, 2011 03:37 AM)iRun™ Wrote: [\[CITE\]](#) You should add what Jailbreak programs work with an iOS. For example Greenpois0n works with 4.1, 4.2.1, nothing else.
But you can downgrade down to 4.1 and 4.2.1. So it dosn't really matter. :)

Thanks for the feed back
