Thread: [\[FREE\] Moudi Crypter v1.1 Public 100% FUD !!! \[No shitcash\]](#)

mou3li - September 26, 2011, 1:59 pm

previous version :

<https://hackforums.net/showthread.php?tid=1764172>

screenshot :

change log :

BUGs : bug fixed when crypting non exe files

bug fixed while writing non exe files (removed this option till further update)

Improvmnts : added a function that generates a new encryption key each time.

GUI :

some minor GUI changes

VT scan of the crypter itself :

<http://www.virustotal.com/file-scan/report.html?id=c61c907212ba10a90f8e69cf55035baf07b3ed2296854e7c8daec8c6eebc80e8-1317073753>

i dont mind scanning the crypter in VT because it will stay FUD forever. this is clean shit and will stay clean just make sure you download from MY LINKS ONLY.

virus scan of a generated exe on NVT :

File Info

proof am not fake :

i gave this guy a teamviewer look. (he said he will vouch after the teamviewer but he did not, idk why)

(Sep 26, 2011 03:42 PM)._. Wrote: [\[CITE\]](#) Well he downloaded the file on his own Download link - ran the .exe and crypted it. It doesnt run on my Sandboxie but on his - file is clean but I'll test it on my Virtual Box - lets see how it will end :D

free download :

Code <http://www.mediafire.com/?4bw4kiw427ohtwg>

Deus_ - September 26, 2011, 2:56 pm

Quote:

<http://www.virustotal.com/file-scan/report.html?id=c61c907212ba10a90f8e69cf55035baf07b3ed2296854e7c8daec8c6eebc80e8-1317073753>

Doesnt run on Sandboxie - seems to be a fake.

Lexit_Gravite - September 26, 2011, 2:59 pm

Not trying to be mean or anything, but since 0 rep I understand if people think this is a virus. I ran it in Sandboxie and no other file was ran except for the crypter, so I'm going to trust you on this one :D Everyone has to start off though, hope to see further updates. Thanks for not using SHITCASH. I hope all others like this, good day to you sir.

(Sep 26, 2011 02:56 PM)._. Wrote: [\[CITE\]](#) Doesnt run on Sandboxie - seems to be a fake.

Mine ran on Sandboxie. I really hate the "Too short" messags. ?

The Alex - September 26, 2011, 3:04 pm

I'm going to need some reassuring, you barley have any posts, you have included a download link which is unusual and you have 0 rep. Someone confirm please?

mou3li - September 26, 2011, 3:07 pm

(Sep 26, 2011 02:56 PM)._. Wrote: [\[CITE\]](#) Doesnt run on Sandboxie - seems to be a fake.

it does run in my sandboxie, please check again.

if not tell me what happens exactly

Lexit_Gravite - September 26, 2011, 3:07 pm

That's what I said to him in a Private Message. Like I said, it worked on Sandboxie, and the only file opened was Moudie Crypter 1.1 Public.exe

Still, I would wait for 3-5 more confirmations.

mou3li - September 26, 2011, 3:09 pm

thanks for your understanding and yeah this is my first crypter i make. and this is the first update, the old version is flamed by some wierd people that dont know me, so i was attacked heavily.

i did not use shitcash because i used it when i posted the v1.0 and got my thread moved somewhere. i dont know why me because every one is using it and not getting them posts moved elsewhere.

Lexit_Gravite - September 26, 2011, 3:11 pm

(Sep 26, 2011 03:09 PM)mou3li Wrote: [\[CITE\]](#) thanks for your understanding and yeah this is my first crypter i make. and this is the first update, the old version is flamed by some wierd people that dont know me, so i was attacked heavily.

what reassuring you need ? i dont have much posts because i am new, if you guys trust the huge number of posts, i guess i cant be trusted YET.

i did not use sh4r3cash because when i did, they removed my thread from this section.

Deus_ - September 26, 2011, 3:14 pm

(Sep 26, 2011 03:12 PM)mou3li Wrote: [\[CITE\]](#) what reassuring you need ? i dont have much posts because i am new, if you guys trust the huge number of posts, i guess i cant be trusted YET.

Crypt a file for me on Teamviewer, and I'll vouch for you otherwise you area fake.

Lexit_Gravite - September 26, 2011, 3:15 pm

To all: Make sure you store the crypter at a location you want the crypted file placed. DO NOT run it from Downloads, unless you want to scroll to it :D

mou3li - September 26, 2011, 3:16 pm

(Sep 26, 2011 03:11 PM)Lexit_Gravite Wrote: [\[CITE\]](#) I'm happy that you used Mediafire! Heck that makes me want to put my hands up and shout hallelujah. Are you planning to do further updates? KEEP ME IN TOUCH!

yes i am planning to keep updating whenever i got the chance to. its just that collage takes a lot of my time for now.

i will be releasing my first private version for free too, expect it to be here very soon
(Sep 26, 2011 03:14 PM)._. Wrote: [\[CITE\]](#) Crypt a file for me on Teamviewer, and I'll vouch for you otherwise you area fake.
let me get teamviewer and i will PM you.

DeFactos - September 26, 2011, 3:20 pm

And thank all of you for scanning on VT. Probably not going to stay FUD for long.

Lexit_Gravite - September 26, 2011, 3:29 pm

(Sep 26, 2011 03:20 PM)DeFactos Wrote: [\[CITE\]](#) And thank all of you for scanning on VT. Probably not going to stay FUD for long.

Eh, don't be so negative. This guy seems excited about making crypters. NOOBS AINT GONE BRING HIM DOWN, NOW HE ON A ROLE. ?

DeFactos - September 26, 2011, 3:31 pm

Password encryption FTW!!

I think if it isn't shitcash then it should be crypted password with MD5 salt hash or some even simple crypto combination.

Lexit_Gravite - September 26, 2011, 3:33 pm

(Sep 26, 2011 03:31 PM)DeFactos Wrote: [\[CITE\]](#) Password encryption FTW!!

True, true. Just theres times where passwords make me say yep F this. But yeah, I get what your saying. But if you really mean "Simple" then it would keep it a FUD a little longer.?

i used RC4 for the encryption and when it got detected it would be by the time i release 3 or 4 other versions which are gonna be fud ofcourse, so yeah let them haters scan wherever the hell they want.

one more point to make.

i don't sell hacking tools, because hacking is about fucking up security. i dont crypt my crypters, people can disassemble/decompile my stuff easily, even the priv8 ones, because i dont use security, i fuck it up.

Still good results, I'd say if we changed the Icon, and used ResHacker to give it a version, and author it would make it FUD, not for sure. Should I try?

YEP, it works if you give it an Icon, and use ResHack to add some some file info.

sti831 - September 26, 2011, 5:39 pm

But i just tried running my server and it doesnt do anything at all... any ideas what might of happened?

Lexit_Gravite - September 26, 2011, 5:41 pm

(Sep 26, 2011 05:39 PM)sti831 Wrote: [\[CITE\]](#) But i just tried running my server and it doesnt do anything at all... any ideas what might of happened?

Did you run it in Sandboxie? If so, you may have selected Anti-Sandboxie which forbids it from running in Sandboxie, this will sometimes get your source caught fast, but also could prevent people from pinpointing your process. What did you form the Server with?

sti831 - September 26, 2011, 5:41 pm

it says svhost has stopped working..

no im testing it on my laptop, im using cyber gate, and before i crypt it, it works fine and connects, but after crypt it wont do anything nor connect

emm, it should work. but tell you what, try building a basic server, means dont use any function provided by the RAT no artis nothing and test again.

this crypter crypts clean files, it messes up already crypted/obfescated stuff.

Lexit_Gravite - September 26, 2011, 6:13 pm

(Sep 26, 2011 05:50 PM)mou3li Wrote: [\[CITE\]](#) emm, it should work. but tell you what, try building a basic server, means dont use any function provided by the RAT no artis nothing and test again.

this crypter crypts clean files, it messes up already crypted/obfescated stuff.

So your saying do not crypt a file that has already been crypted?

mou3li - September 26, 2011, 6:16 pm

(Sep 26, 2011 06:13 PM)Lexit_Gravite Wrote: [\[CITE\]](#) So your saying do not crypt a file that has

already been crypted?

yeah, because if you do, the function may generate double crypted chars which could be unknown to windows, which wont be able to decrypt it at the runtime.

Lexit Gravite - September 26, 2011, 6:17 pm

(Sep 26, 2011 06:16 PM)mou3li Wrote: [\[CITE\]](#) yeah, because if you do, the function may generate double crypted chars which could be unknown to windows, which wont be able to decrypt it at the runtime.

Hopefully it helps this guy out. ?

sti831 - September 26, 2011, 8:30 pm

all right ill try it out right now. thanks for the advice

i took off all the anti's,, took of compress with upx, took of keylogger and message box, under installation i took of; active setup, polices\explorer\run, presistance, hide file, and melt file... and still says the same thing.. cryptedbymoudi.exe has stopped working.

fred goffa - September 27, 2011, 12:21 am

Thank you mate cheers, there is alot of assholes on these fuoms who put up shit cash download links :/

mou3li - September 27, 2011, 1:20 am

(Sep 26, 2011 08:30 PM)sti831 Wrote: [\[CITE\]](#) all right ill try it out right now. thanks for the advice

i guess then the file generated by your RAT is crypted somehow even without UPX. this is the only explanation. try to use with an other RAT for a change.

Auschwitz88 - September 27, 2011, 1:29 am

I'll try it, mate. It's working with DarkComet RAT ?

mou3li - September 27, 2011, 1:58 am

(Sep 27, 2011 01:29 AM)Auschwitz88 Wrote: [\[CITE\]](#) I'll try it, mate. It's working with DarkComet RAT ?

unfortunately the current version of DC is not cryptable by my crypter. (or anyother public crypter out there,)

i make my DC FUD by changing assembly info and some HEX Values.
am releasing V 1.2 today, hope you guys try it and feedback me about it ;)

So not FUD, but pretty close. Thanks for your work!

this is a beta version, don't expect too much now, plus noobs been submitting them crypted stuff to VT. change the encrypted file's icon and you will defeat Avira result and you get your FUD server.

there will be a perfect v1.2 very soon.

hiperpoo - September 27, 2011, 3:48 pm

Thank GOD For No \$hitCash Not Too Sure It's Still FUD :/

i said i dont care because submitting the crypter it self to VT wont do any damage, it will stay undetected. but submitting the samples it makes, is GAY.

Maurits - September 28, 2011, 10:35 am

Thanks for the link, But it doesn't work with CyberInc 1.1 :(
Can you make it cryptable for Cyberinc?

Stockholm - September 28, 2011, 10:41 am

DIDNT WORK ON LOST&DOOR RAT! JUST TO REMIND U!

mou3li - September 28, 2011, 12:44 pm

(Sep 28, 2011 10:41 AM)Stockholm Wrote: [\[CITE\]](#) DIDNT WORK ON LOST&DOOR RAT! JUST TO REMIND U!

i hate CAPS man, dont use them, i feel like you are yelling at me.

sorry it did not work on your server. but i am sure my crypter crypts clean/non obfuscated servers perfectly.

Rwkeith - September 28, 2011, 4:34 pm

When you say Clean/Non-Obfuscated, does that mean files that have been packed as well?

dimi.sadlove - September 28, 2011, 6:06 pm

@ mou3li, i have a question .

is it working for Spy-Net ?

well, Avira detected it, so it's not FUD
here is the result

<http://my-avscan.net/result.php?scan=MjExMzY4>

hisoka34 - September 29, 2011, 9:57 am

It work for me ... don't worry guy's.

Fondly.

darkdamp - September 29, 2011, 11:35 am

Thank you so much for this! (Y)

Works great for me :D

dimi.sadlove - September 29, 2011, 12:16 pm

2/35 is not a bad result, just Avira and Kaspersky detected it !

<http://synfyre.net/scan/98003965a937787891c2997c1514d68f>

Lol, to make it FUD change the icon, and use resHack to edit file information.... Didn't you see me post that like three times? Also, this is his older one, he has released an updated one, and is working a newer version that will work with R.A.Ts. Good day to you sir ?

super2277 - September 29, 2011, 12:31 pm

Not work for me. Dont even show up my rat

mou3li - September 29, 2011, 1:12 pm

(Sep 28, 2011 04:34 PM)Rwkeith Wrote: [\[CITE\]](#) When you say Clean/Non-Obfuscated, does that mean files that have been packed as well?

means files that are not packed, packed ones will be damaged

since its now detected by KasperSky, new version (1.2 beta 3) will not be released, i will refud it and make a lot of changes in the next version (1.2 beta 4) which will be released next weak. sorry guys for being late, its just noobs keep buging me about not working with thier packed/rats which makes

me have to re do all the tests to make sure it works.

Lexit_Gravite - September 29, 2011, 3:02 pm

badlyfar - September 30, 2011, 6:52 pm

This crypter has a .NET dependency. therefore, it will be 35/35 in less than two days.

pvpoodle - October 1, 2011, 9:27 pm

it crypts the servers successfully. when i tried to run the server inside a vm it gave me an error that said .net 4.0 is required. after installing .net 4.0 and then trying to run the servers i get an error like server.exe has stoped working.

same problem with both xtreme rat 3.0 and darkcomet 4.1.

if you could fix this problem with the crypter corrupting exe's id definitely use it.

mou3li - October 2, 2011, 6:59 am
