Thread: [Reverence Presents: Graphics Help Desk and Technical Support](#)

khaleesi - September 29, 2011, 10:39 am

[img]http://img20.imageshack.us/img20/4889/headeriut.png[/img]

Hello members of HackForums, this thread is designed to help answer all questions, and to solve all problems related to graphics. Although the Reverence Graphics Crew cannot solve every problem we will do everything we possibly do to help you out. From setting up your graphics program to showing you the tools, we will work with you to solve your problems. By having so many dedicated members working to solve your problems, we can take our time to work with each applicant who seeks this service, providing you with a valuable, accurate assessment and ways to solve the problem. Although we specify in Graphics we will attempt to fix your graphic software errors with the program you're using if you have any, and if requested. To request, PM a Reverence Graphics Crew member.

Please use this application if you have any miscellaneous questions that revolves around graphics. The Reverence Graphics Crew will do the best they possibly can to make sure your questions are answered according to the information given to us through your application.

Code [font=monotype corsiva][size=large][color=white]Username:[/color][size][font]

[font=monotype corsiva][size=large][color=white]Graphic Program:[/color][size][font]

[font=monotype corsiva][size=large][color=white]Problem/s:[/color][size][font]

[font=monotype corsiva][size=large][color=white]Has this problem happened before?:[/color][size][font]

[font=monotype corsiva][size=large][color=white]Explain the Problem (The more details you provide us the easier it will be for use to help you):[/color][size][font]

[font=monotype corsiva][size=large][color=white]How long have you had this problem?:[/color][size][font]

[font=monotype corsiva][size=large][color=white]Anything else?:[/color][size][font]

The Reverence Graphics Crew will do the best they possibly can to create a welcoming environment where all answers can be met. If there is anything else needed by any members seeking service again feel free to PM any of the Reverence members that you see active in this thread. With each question answered we will add the solution to the thread to allow other users to quickly navigate through them, seeing if the answer to their question is located there.

NOTE: Some of the staff will only be efficient in solving your problems with specific graphic software's, please understand if we direct you to another staff member. We will do the best we can to make sure the staff member you are working with can help you accordingly to your problem/question.

kyoutu - September 29, 2011, 10:49 am

This seems lovely. =3 Good luck with this.

Prominent - September 29, 2011, 10:54 am

I can vouch for my Reverence mates anytime ! Good luck with managing the help desk :)

Uzi? - September 29, 2011, 11:20 am

I can give my vouch, decent enough thread. Looks very well planned out unlike some other threads I've seen around. This support topic should become successful, I couldn't really see why it wouldn't. Best of luck Dope.

McFlurry - September 29, 2011, 11:42 am

Looks great. I hope this will help out a lot of members.

Sol Yurick - September 30, 2011, 4:48 am

Looks really good, Well done Team! Goodluck.,

Anything else?:No

You need a decent brush, and a decent smudge settings.

For example, use a regular round brush, with a good size and mess around with the smudge setting till you like it.

To change your setting, click on the smudge icon, then select your brush, next you click this icon which is on the top left; Spoiler [\(Click to View\)](#)

Then, you'll see this box;  (Just with different settings), and you play around with your settings till you like the outcome of the smudge.

Anything else?: Great thread.

Make a new file, then make sure it's on this setting; Spoiler [\(Click to View\)](#)

Then make sure you don't put a white background, or black just continue whatever you're doing without any background color, then just save it as PNG when you're done.

It'll take you a while to master web-designing because it isn't easy.

I rather do web-design with Photoshop CS5, because Illustrator is more of a vectoring program, and Photoshop has more tools, etc. But you can do some vectoring, and extract to Photoshop if you'd like.

Beginner tutorial to web-design:

<http://www.youtube.com/watch?v=emGrwAEbrXc>
<http://www.youtube.com/watch?v=n2um5Ee1Fv8&feature=related>
<http://www.youtube.com/watch?v=cmqKtMmxlaE&feature=related>

Three parts.
