Thread: [VB.Net Teaching Service \[Free\] \[Limited\]](#)

**?Demon** - October 1, 2011, 10:38 am

I will be teaching/helping/answering questions over MSN. This service IS exclusive and I have the right to terminate it at any time.

Quick list of people I won't help:  
Ungrateful People

People who do nothing for themselves.

Ignorant people.

People who ask about EVERYTHING.

Someone who refuses to use Google.

Wastes My Time

The list may be further updated, that being read, feel free to apply and depending on the people I'll take a certain amount.

DO NOT PM ME TILL I HAVE SAID YES.

Apply on thread, no specific format, but if you type it like a dumbass your chances decrease. =P

**Redeemz** - October 1, 2011, 10:45 am

Hehe I know a lot about coding in vb.net and have read two books but i'm interested in your classes to further my knowledge on sed topic.

**Penthos** - October 1, 2011, 10:45 am

Just wanted to say, that's a nice service to extend to HF, Good luck with the Teaching :P

Kind regards,

Trinity

**Dr. A. NonyMouse** - October 1, 2011, 11:27 am

I have recently become interested in coding so i would love it if you would teach me.  
Thank you for considering my application.

**Zethit** - October 1, 2011, 5:04 pm

Hi, i need a teacher to learn vb.net, im a fast learner and i really want to learn this. Im 18 years old so im not a kids without any kindness.

**?Demon** - October 2, 2011, 1:05 am

Alright, you guys can PM me (Trinity already did.) You're all accepted. ^.^ You're not all in the same class though, one conversation per person. Individual needs, right? =P

D??t? - October 2, 2011, 1:07 am

Can i have a teach to use proxy with post method ?

i mean i want to use proxy in my youtube bot .  
use proxy with httpwebrequest not webrowsers

?Demon - October 2, 2011, 1:14 am

Google teaches questions better then I do.

<http://prntscr.com/3aljz> which will lead you to  
<http://msdn.microsoft.com/en-us/library/system.net.httpwebrequest.proxy.aspx> which will give you the full source of:

Code ' Create a new request to the mentioned URL.

```
Dim myWebRequest As HttpWebRequest =  
CType(WebRequest.Create("http://www.microsoft.com"), HttpWebRequest)  
  
    ' Obtain the 'Proxy' of the Default browser.  
    Dim proxy as IWebProxy = CType(myWebRequest.Proxy, IWebProxy)  
    ' Print the Proxy Url to the console.  
If Not proxy Is Nothing Then  
    Console.WriteLine("Proxy: {0}", proxy.GetProxy(myWebRequest.RequestUri))  
Else  
    Console.WriteLine("Proxy is null; no proxy will be used")  
End If
```

```
Dim myProxy As New WebProxy()
```

```
Console.WriteLine(ControlChars.Cr + "Please enter the new Proxy Address that is to be set ")  
Console.WriteLine("(Example:http://myproxy.example.com:port)")  
Dim proxyAddress As String  
Try  
    proxyAddress = Console.ReadLine()  
If proxyAddress.Length = 0 Then  
    myWebRequest.Proxy = myProxy  
Else  
    Console.WriteLine(ControlChars.Cr + "Please enter the Credentials (may not be needed)")  
    Console.WriteLine("Username:")  
    Dim username As String  
    username = Console.ReadLine()  
    Console.WriteLine(ControlChars.Cr + "Password:")  
    Dim password As String  
    password = Console.ReadLine()  
    ' Create a new Uri object.  
    Dim newUri As New Uri(proxyAddress)  
    ' Associate the newUri object to 'myProxy' object so that new myProxy settings can be set.  
    myProxy.Address = newUri  
    ' Create a NetworkCredential object and associate it with the Proxy property of request object.  
    myProxy.Credentials = New NetworkCredential(username, password)  
    myWebRequest.Proxy = myProxy
```

```
End If
Console.WriteLine(ControlChars.Cr + "The Address of the new Proxy settings are {0}",
myProxy.Address)
Dim myWebResponse As HttpWebResponse = CType(myWebRequest.GetResponse(),
HttpWebResponse)
I suggest you read the page. ^.^
```

**D??t?** - October 2, 2011, 1:17 am

i had seen it yet mate . But it will lock here  
proxy.GetProxy(myWebRequest.RequestUri))  
I mean show error

**?Demon** - October 2, 2011, 1:18 am

What error does it show? It could just be the proxy's fault. Have you tested the proxy?

**Support.** - October 2, 2011, 1:27 am

Hey, I've been learning VB for about 2 weeks now and seriously want to improve. I'm not here to "code a RAT/Crypter." I want to learn so when my baby girl is old enough for school I can get qualified quickly and get a career. I've NEVER C+P, I retype everything and try and understand everyline. Thanks for your time.

**D??t?** - October 2, 2011, 1:29 am

(Oct 2, 2011 01:18 AM)?Demon Wrote: [\[CITE\]](#) What error does it show? It could just be the proxy's fault. Have you tested the proxy?

Look the project then you will understand

<http://up.ht/q2IJxw>

If you can fix it .fix it in the project and give here ?

**?Demon** - October 2, 2011, 1:31 am

I already did it without an error.

Code Imports System.Net

Module Module1

Sub Main()

' Create a new request to the mentioned URL.

Dim myWebRequest As HttpWebRequest =  
CType(WebRequest.Create("http://www.microsoft.com"), HttpWebRequest)

' Obtain the 'Proxy' of the Default browser.

Dim proxy As IWebProxy = CType(myWebRequest.Proxy, IWebProxy)

' Print the Proxy Url to the console.

If Not proxy Is Nothing Then

Console.WriteLine("Proxy: {0}", proxy.GetProxy(myWebRequest.RequestUri))

Else

Console.WriteLine("Proxy is null; no proxy will be used")

End If

Dim myProxy As New WebProxy()

Console.WriteLine(ControlChars.Cr + "Please enter the new Proxy Address that is to be set ")

```

Console.WriteLine("(Example:http://myproxy.example.com:port)")
Dim proxyAddress As String
Try
    proxyAddress = Console.ReadLine()
    If proxyAddress.Length = 0 Then
        myWebRequest.Proxy = myProxy
        ' Create a new Uri object.
        Dim newUri As New Uri(proxyAddress)
        ' Associate the newUri object to 'myProxy' object so that new myProxy settings can be set.
        myProxy.Address = newUri
        ' Create a NetworkCredential object and associate it with the Proxy property of request object.
        myWebRequest.Proxy = myProxy
    End If

    Dim myWebResponse As HttpWebResponse = CType(myWebRequest.GetResponse(),
HttpWebResponse)

    Console.ReadLine()

Catch Ex As Exception

    MsgBox(Ex.ToString)

End Try

End Sub

```

End Module

I edited the code a bit, but it could just be your proxy or the way you put it in.  
<http://hidemyass.com/proxy-list/> There's a list.

And Kommon, I'd be happy to help, you can PM me for my private MSN.

**D??t?** - October 2, 2011, 1:40 am

what error did you fixed ? I am not talking about that - error had in source .

I am saying when i hit "use proxy button" at that time it will lock there /

show me this msg

Code MsgBox(Ex.ToString)

You have teamviewer ?

Code Private Sub Button1\_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)  
Handles Button1.Click

' Create a new request to the mentioned URL.

Dim myWebRequest As HttpWebRequest =  
CType(WebRequest.Create("http://www.microsoft.com"), HttpWebRequest)

' Obtain the 'Proxy' of the Default browser.

Dim proxy As IWebProxy = CType(myWebRequest.Proxy, IWebProxy)

' Print the Proxy Url to the console.

If Not proxy Is Nothing Then

Console.WriteLine("Proxy: {0}", proxy.GetProxy(myWebRequest.RequestUri))

Else

Console.WriteLine("Proxy is null; no proxy will be used")

End If

Dim myProxy As New WebProxy()

Console.WriteLine(ControlChars.Cr + "Please enter the new Proxy Address that is to be set ")  
Console.WriteLine("218.190.251.177:8909")

Dim proxyAddress As String

Try

proxyAddress = Console.ReadLine()

If proxyAddress.Length = 0 Then

myWebRequest.Proxy = myProxy

' Create a new Uri object.

Dim newUri As New Uri(proxyAddress)

' Associate the newUri object to 'myProxy' object so that new myProxy settings can be set.

myProxy.Address = newUri

' Create a NetworkCredential object and associate it with the Proxy property of request object.

myWebRequest.Proxy = myProxy

End If

Dim myWebResponse As HttpWebResponse = CType(myWebRequest.GetResponse(),  
HttpWebResponse)

Console.ReadLine()

Catch Ex As Exception

MsgBox(Ex.ToString)

End Try

End Sub

?Demon - October 2, 2011, 1:41 am

I do, but I hate Team Viewer. xD What I'm saying is the code I gave you works without an error, so just adapt it to what you need.

D??t? - October 2, 2011, 1:44 am

Loll you gave the code and before code same . Same error when i use proxy

?Demon - October 2, 2011, 1:46 am

Then your proxy is the problem, what's the exception?

D??t? - October 2, 2011, 1:47 am

(Oct 2, 2011 01:46 AM)?Demon Wrote: [\[CITE\]](#) Then your proxy is the problem, what's the exception?

Code Catch Ex As Exception

MsgBox(Ex.ToString)

End Try

?Demon - October 2, 2011, 1:47 am

What's the exception means what's ex in catch ex as exception, what's the error, not the code. xD

**D??t?** - October 2, 2011, 1:50 am

(Oct 2, 2011 01:47 AM)?Demon Wrote: [\[CITE\]](#) What's the exception means what's ex in catch ex as exception, what's the error, not the code. xD  
already said when i trying to use proxy that time it will show me that exception msg.

Fucking tv can solve it .

**?Demon** - October 2, 2011, 1:52 am

I don't think you understood me so Team Viewer is the only way unfortunately, one sec I'll install it, in the mean time PM me your team viewer credentials.

**D??t?** - October 2, 2011, 1:56 am

I had done to pm you .Now hope the problem will be solv.

My english is very bad that is for i failed to explend u what i tried to saying

**Weakky.** - October 2, 2011, 2:02 am

I would be very grateful if you could teach me :).

**?Demon** - October 2, 2011, 2:04 am

We spoke already, accepted. =P And anyone who has been accepted, it is your responsibility to message me on MSN at times you want to be taught. I have too many people to run after each asking if they're ready.

**asniex** - October 2, 2011, 2:09 am

Hi mate i just started learning Vb.net from youtube videos n ebooks . It would be great if some1 could teach me and clear my doubts . I know to use google very well . Hope i get in to your class .

**?Demon** - October 2, 2011, 2:10 am

Sure, you can. At this rate I'll have to have specific teaching days. xD Asniex, PM me your MSN and I'll add you.

**Pixelblocker** - October 2, 2011, 3:24 am

I have one simple question and I cant find the answer so...

How to read a specific line of a txt file, say I want to read line 6 in my txt file how can I do that with streamreader?

**?Demon** - October 2, 2011, 3:30 am

Googling <http://prntscr.com/3an4u> brings you to <http://www.vbforums.com/showthread.php?t=513461> . Does that help? =P

**Pixelblocker** - October 2, 2011, 3:35 am

Haha I searched for the same but I think I did not read it good coz now it works xD Thanks

**?Demon** - October 2, 2011, 3:36 am

Oh well, you live and you learn. =P

**lamerbro** - October 2, 2011, 3:38 am

Quite a fast learner here bro. Im really hands on and like to play with everything i can get in touch with i just like a little guidance from a mentor sometimes sense it's alot easier coming from another persons perspective that already has the knowledge :D.

**?Demon** - October 2, 2011, 3:39 am

You can PM me your MSN and I'll help you out when you need it. ^.^

**Pixelblocker** - October 2, 2011, 3:45 am

huh? wtf? now I get this error at this line...

```
Code Dim lines As String = File.ReadAllLines("C:\Users\X-5400\Desktop\test.txt")
Dim line3 As String = lines(2)Error: Value of type '1-dimensional array of String' cannot be
converted to 'String'.
```

```
At: Dim lines As String = File.ReadAllLines("C:\Users\X-5400\Desktop\test.txt")
```

**SIM-888979** - October 2, 2011, 3:57 am

Would you be able to teach me how to use RunPE? I don't really get the process of calling it since I'm a beginner, would love to get you to teach me via PM / MSN.

**Will and Integrity** - October 2, 2011, 3:59 am

Hey I could use the help. I don't code as much as I used to, but I'd still like to get better. Thanks bro.

**?Demon** - October 2, 2011, 4:01 am

I don't teach RunPEs as I don't deal with malware, but you guys can PM me your MSNs.

**Sol Yurick** - October 2, 2011, 4:03 am

Hello,

Unfortunately I have found some LQP, Off-Topic or Flaming posts. I did infact have to remove them because they all fall under breaking HF rules. If you have any questions feel free to PM me.

We also recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

Thank you,  
Astonish is NJ

**?Demon** - October 2, 2011, 4:06 am

I believe you mean the double post Astonish, &

does this code help:

```
Code Dim o As New OpenFileDialog
o.ShowDialog()
```

```
Dim reader As StreamReader = New StreamReader(o.FileName)
```

```
Dim line As String = Nothing
Dim lineCounter As Integer = 0
If line <> reader.ReadLine() Then
    lineCounter = lineCounter + 1
```

```
    If lineCounter = 4 Then
        MsgBox("Found it.")
    End If
End If
```

```
End Sub
```

**Pixelblocker** - October 2, 2011, 4:23 am

Nothing happens if I open a little textfile... No msgbox...

**?Demon** - October 2, 2011, 4:28 am

Oh my gosh. xD If you want to get lazy you could add it to a listbox line by line and go to a specific line from a listbox, possibly just add it to an array and go to specific parts of the array.

**Submariner** - October 2, 2011, 4:47 am

Huge Vouch For Demon He teach me 2 leassons about vb.net thanks for that :)

**Blizzard** - October 2, 2011, 4:57 am

This is something good and unique service you are doing here for free, Great job

-Blz

**?Demon** - October 2, 2011, 5:18 am

Cyber, you're never on MSN, I feel like killing you. xD Thanks Blizzard. =P Thanks Cyber. =D

**Submariner** - October 2, 2011, 5:19 am

(Oct 2, 2011 05:18 AM)?Demon Wrote: [\[CITE\]](#) Cyber, you're never on MSN, I feel like killing you. xD Thanks Blizzard. =P Thanks Cyber. =D

I reformed my PC like 5 times in this week, I will install now MSN and I will connect :)

**?Demon** - October 2, 2011, 5:20 am

<http://www.iloveim.com/>

Login there. ^.^

**d@rk5id3** - October 2, 2011, 7:27 am

I'm going to start learning VB.NET I could use some help/guidance.

**?Demon** - October 2, 2011, 8:41 am

You can PM me your MSN bro. ^.^ Places left to be taught will be closed soon.

**Wargod** - October 5, 2011, 11:33 am

i would like to teach me mate!!! thanks in advance

**?Demon** - October 5, 2011, 11:38 am

Sure, PM me your MSN. Last two places left are exclusive so may the best member win. ^.^
