Thread: [AACraft server for AA is finally open!](#)

Fox - October 2, 2011, 3:54 pm

[\[img\]http://hfimage.net/images/xyxnzsj59sytlh39cxwq.png\[/img\]](http://hfimage.net/images/xyxnzsj59sytlh39cxwq.png)

It's been a little over 2 weeks since I first talked about my idea and now it's finally here. AACraft is now open to the public! It is a 1.8.1 bukkit survival server with a few plugins.

For the past few days, I had some AA people test out the server and the plugins and it is all working out.

Although, there are some problems with the server at times and I am still working on it. If you need help or have any questions, feel free to PM me or ask someone in the server. You may also visit the [site](#) for more info, including [commands](#).

Some features and info:

- Whitelist (You cannot join the server if you are not on the whitelist.)
- Economy system (Everyone starts out with \$200.)
- PVP is disabled.
- Jail (For people who are annoying or don't follow the rules.)
- Chest Shop system. (Sell and buy items.)
- Any chests, signs, and furnaces you place are automatically protected and only you can access/break it.
- You can also protect doors.
- You can un-protect them if you wish.
- Spawn and Home commands.
- You can request a player to teleport to them. (That player can accept or deny your request.)
- Set your own nickname. (I recommend using your HF username.)
- Creepers will not destroy blocks but can still hurt players.
- TNT explosions and damage are disabled.
- Enderman will not pick up blocks.
- Lots of other features that I did not mention.

Simple Rules:

- No griefing or stealing.
- No hacking and/or flying.
- Be respectful to other players.
- Do not ask to be staff or admin/op.

This server is supposed to be for people who are active in AA or at least likes anime.

If you want to get whitelisted, you must meet ALL of the following requirements:

- Have at least 100 posts AND at least 50 posts in the AA section. (I will check.)
- Have positive reputation.
- Have been a member for at least 1 month.
- Must be at least a good quality member overall. (I will check.)

If you meet all these requirements, PM me with your MC username and I will check and then add you to the whitelist if I approve.

Awesome, I'll probably PM you if the server I'm currently on goes down.

Fox - October 2, 2011, 4:24 pm

Alright. Hopefully I get a lot of people to join. ^^

Black Hole - October 2, 2011, 4:26 pm

Woo, server finally public! Go buy stuff from my store :D

oneechan - October 2, 2011, 4:29 pm

Yay! I was mentioned. <3 Hope more people join in. :)

Tasemu - October 2, 2011, 6:34 pm

One question as I know little to nothing about minecraft, do I have to have an actual paid minecraft account in order to play on private servers or is it just a input server connection and it'll try to connect to it irregardless if I have an actual account or not?

Fox - October 2, 2011, 6:50 pm

From what I know, you need to have an actual Minecraft account.

I've heard of cracked clients but I never tried them nor do I know how they work. =P

Unless it's a server with onlinemode set to false, then you have to have a paid account.

Just go grab a free minecraft account from one of the threads here on HF.

Wish I could play with you guys, but I'm working as an admin now on another server and have like zero time.

If you still feel like adding me to the whitelist my username is MeowDesu, ill try to pop in when I can.

Yes I have a cracked client that's why I was asking. That's fine, I could attempt to get a minecraft account soon I guess as I have a friend that's been telling me to for months now.

At the bottom? I noticed that, but since there was another entrance, I left it thinking you put it there. I just put dirt around it though, but I noticed it far before me or Okazaki became staff.

When I buy a better server, I will cut the player cap to 10.

Which means a maximum of 10 people can be online at the same time.

The server is up now. It can handle up to 4 people without lag for me. Also, I never experienced a white screen even with 8 people online.

It's not a shit server, it's just your connection. I'm planning to buy a better server anyways.

the servers hosting in the USA thats why you lag more bamfon,, i have told you this over 9000 times.

Layfon - October 8, 2011, 12:45 pm

Hmm, yay.

Anyway I think it gives white screen thing if you use webclient, otherwise it takes ages to load otherwise.

I am quitting this shit server, there are immature unexperienced staff members who directly blame me of griefing just because I was on before them, then give me Jailtime, kicks and ban. Faggots put lava in your house constantly And members steal your stuff if you keep in public chests (doesn't matter though cause you can haz bam <3) Not to mention guys plotting against me to catch me

I cannot comment on the first few statements as I have yet to have banned/kicked/jailed or otherwise troubled someone wrongfully and without sound reason. However, I'm sure they had their reasons. Heck, any and all current staff have a variety tools at their disposal to find out griefers and troublemakers if the situation requires.

Public Chests are that...public. If you don't want you stuff stolen, make a Private Chest? =/

Also Clearly they don't.

Well, honestly, you DID chose a unsecure way of sharing items on accounts. Although, you can always contact Fox for support.

As far as I know, not once have you been staff and/or seen what tools we possess. So yeah... However, if you have a problem with one of the staff contact him/her or just contact Fox. Complaining/raging on the thread and threatening to leave really won't get you far.

Layfon - October 8, 2011, 1:31 pm

Well this is foxes thread, so He sees it. (I am complaining to fox)

And I have been staff before on websites, Even managed/owned. Also I just started MC kind of recently, I was playing around with my own bukkit server for test purposes and I know what they have, what they don't. Tasemu was right, if you just give and take staff away like this it doesn't end out good.

Now we have a inexperienced staff member who doesn't know shit, abuses and can't do what he has to, and directs his powers upon someone because he hates me outside of MC.

Actually, you're complaining to all staff and showing off how much we/the server "sucks" right now since everyone can read this. Not only Fox. When speaking to someone close by, do we shout it out so everyone can hear, or do we speak normally?

I too have been staff on many sites before. Some big some now long gone. Fox DID install specific plugins to give staff more power/tools for when needed. Not like every MC Server is the exact same.

Fox gave staff to those he deemed qualified for the server's needs. Who would you rather have staff anyway?

To be honest and fair to Okazaki, I think a lot of people aren't particularly fond of you. >_< But that's another matter, and I'm staying fairly neutral on that matter though.

Layfon - October 8, 2011, 1:45 pm

Fox reads this = he reads it. Calm down about me telling fox, because technically I am.

Also He clearly has no knowledge of who is deemed qualified or not. Neither do I care anymore.

Quote:When speaking to someone close by, do we shout it out so everyone can hear, or do we speak normally?

We can shout however we want, it makes no difference. Talking louder than average is in no way disrespectful neither is there anything wrong with it. I posted on this since it is the official AACraft thread.

Like I said for test purposes I have messed around with this shit too, and I know okazaki has no such access, neither if they did he never used it. He logged on and was butthurt of dieing in lava, and says I placed it there because I was on at the time, and how he was on 5 minutes ago and it wasn't there, when I was on for a while and he was too buisy sucking someone elses cock. He then takes action with nothing but sole belief.

Also apart from Black Hole and okazaki I don't think anyone else from HF hates me (apart from the troll/faggots like Almost, nofear1991), I even get along with the people you guys hate (neko) and sorry but Neko is my buddy, and If anyone I would nominate him for anything, Since I know from personal experience he wouldn't abuse. (PERSONAL EXPERIENCE)

Also you can stop complaining about how 'advanced' this server is.

If it was really advanced they would have essential plugins like world guard, made it so adminshop/spawn blocks couldn't be broken.

And also disabled zombie mods.

In my example the person you are talking to also hears it...but so do everyone else. I'm perfectly calm really. Not sure how you'd come to the idea that I am otherwise.

Well, that's your opinion, but I asked who you'd choose as staff then?

In my opinion shouting in public is bothersome to those around. Possibly warranting an arrest for disturbing the peace.

Again, it's rare that two MC Servers are EXACTLY alike. The plugins you install might not be in AACraft. Likewise for Fox. The rest is assumption, and as such, I can't comment on them.

You'd be surprised really. And Neko is generally regarded as a "Fail Troll".

Fox - October 8, 2011, 1:52 pm

I'm reading the server log right now to see what has occurred.

Also, It's true that we cannot find out who placed water/lava blocks.

When did I mention "advanced" in any of my replies? It currently isn't the best and I know it.

It relies mostly on trust for this server. What with the requirements and AA Only rules. But some do break the trust, but staff have been keeping a close eye on them. Haven't had any problems with any of the other players.

I think the Zombies are there by default?

Well my opinion is clearly right, either way I am not producing any noise so you are the dumb one for giving such an example. Also you clearly not calm.

And I used Bukkit server, and AACraft is the same, unless you are telling me they aren't using the current version but some older one which is laggy and buggy, then yeah. You're right. Also I am talking about popular plugins like worldguard, iconomy. Which unless fox downloads them from his friend or something, there the same. And the fact I am saying there not on aacraft means there not. I'm saying Fox should make it so blocks on spawn and adminshop can't be destroyed.

Also Neko, if you got to know him was epic, if anyone I'm gonna stick up for him till the end.

You said how staff can keep an eye of everything we do, but OPs with no access to logs can't. And you know it, or maybe, you clearly don't.

Also the trust clearly fails, and I am talking about fly/xray/speedhack/mob and ores colour thing which is called zombies mod... It enables people to do all that stuff (ofcourse flying is disabled) Since I have noticed Okazaki using fly all the time and getting kicked for using it (or atleast he used to get kicked) Even when he got butthurt in the lava half an hour ago and flew + speedhack like a true fag.

Also my stuff got burnt in the lava too, even though okazaki flew away and his was saved, he shouldn't abuse his powers upon me just because he is butthurt and has no one else to blame it on.

?aragon - October 8, 2011, 2:02 pm

Never mentioned bukkit...at all. I was talking about the combination of plugins used. But yeah, Fox can probably look into adding more plugins for security.

I talked to him a few times. All were praising another troll and flaming AA Members. =/ And so far, I believe other's opinions on him aren't great either.

There's a supposed glitch that falling from high heights counts as flying. And like I said, the people we suspect are already watched when possible. And we haven't had any problems except from those same members. As for Okazaki, I can't deny or agree that he uses a hacks as I haven't seen him.

Although shouldn't the anti fly plugin stop him from flying then if he does it so much?

Layfon - October 8, 2011, 2:07 pm

Clearly many people don't know neko. If anyone he would have abused powers. Neko was the troll none of you guys could ever be. And he knew how to -rep people that stayed there. IF anything he has my Kudos. And yeah he was awesome, 'everyone' else clearly doesn't know him.

Also aacraft is using bukkit, so was I. SO you where unconsciously talking about it all along. And if the opinion fails, no need for it.

I got to go now though so I wont be able to argue anymore till tomorrow.

But you said he was a troll. You idolize someone who tries to make others mad with chaos and disruption? Kinda sounds like a griefer as well really. So shouldn't you like the griefers?

"One who posts a deliberately provocative message to a newsgroup or message board with the intention of causing maximum disruption and argument."

So? I'm talking about plugins. Not bukkit? Plugins != Bukkit

If two people talk about their computer specs. And assuming both have Windows. Are they talking about their computer specs? Or Windows?

Sir Neko - October 8, 2011, 2:16 pm

Minecraft fucking sucks people. <.<

Layfon - October 8, 2011, 2:18 pm

Back, nevermind.

And no not all trolls are like that. And I will continue his legacy.

Also you where talking about the server, you started talking about plugins afterwards and how 'every' server is different... I told you I tested with bukkit, and you never knew AACraft is bukkit server and started saying how it isn't related when clearly it is.

And Plugins & Bukkit is more related that you think.

Also yes they are talking about windows but once again that IRL situation fails if we are talking about MC.

It's the definition so I'll take it by it's definition.

I was saying how MC Server aren't the same because they tend to use a different variety of plugins most of the time. Just because both yours and AACraft both use Bukkit, doesn't automatically make them exactly alike.

Windows and Computers are related as well, but just because you speak of one, doesn't mean you are also speaking of the other.

Just because of what? =/

Layfon - October 8, 2011, 2:26 pm

Well the definition changes in places. A troll is known for many things.

And Bukkit without plugins = the same. I know what (or atleast have a guess of what they got) and I have tested before, so if anyone I know.

Also about the windows this, duhh because we are talking about specs -.-

A few examples would help. Never seen other definitions for a troll except for it's real world meaning.

Yeah, but AACraft indeed DOES have plugins. Can you say without a doubt, 100% that you have the same exact plugins as Fox does?

And yeah, we are talking about plugins. -__-

Layfon - October 8, 2011, 2:31 pm

I know that. But it's more than "big green thing". But was asking for what other kind of "trolls" there could be online if Neko isn't the general troll.

I highly doubt that, but if you seriously assume you made an exact clone of AACraft... Yeah, since I thought "No two servers are 100% alike." would be it for you. So I went in to explain further. But who knows, maybe you do have a few plugins alike? =/

By the way, didn't watch vid. =/ Don't want to. >_<

Layfon - October 8, 2011, 2:42 pm

Well people can even be called a troll, but Neko isn't a typical troll who can't even speak english. You clearly haven't tried to bond with him.

Also, yes IF I know what server someone is using, the plugins (talking about MC) I can easily make a clone, and make all the text, everything exactly like that.

Also that's good, niggas trying to be funny, but seriously I laughed.

A troll is disruptive and makes trouble. Just cause he speaks English doesn't change that definition. And I DID try to have a logical chat with him...just assumed and trolled like all those other trolls I've faced. No better, no worse.

Just from the server?

Layfon - October 8, 2011, 2:50 pm

Well you never took the right approach, you got to first show a troll you are superior in every way, then make friends with him. (Though neko isn't a troll so no)

And yeah, I can tell what plugins they are using from the shops, chest locks, /help etc.

Apart from that I just need to remake anything in that server, and I have made a complete clone of the server itself (not the map)

I think trying to act superior in every way is annoying in it's own way. No matter how you put it so far, Neko is a troll.

What about those background plugins that aren't necessarily even really seen by a user? Or those plugins that only affect staff?

Layfon - October 8, 2011, 2:54 pm

Well like I said, you don't know him, and people can be referred to as trolls, but since you clearly don't know him, nor do you know his reasons you can't call him a troll. And seriously he isn't. He fucks up the fuckers.

Also yeah that I wouldn't be able to see, but in this case I could tell because Okazaki doesn't have access to logs.

He was more active when I first came into AA and other's opinions of him weren't great already. I'm assuming they at least know more of him than me. I didn't really hate him or anything at the time, but as we got into more conversations together, he seemed a lot like a troll to me. Whether he has good reason or not, doesn't change the fact that he acted like one. I was busy dealing with a troll along with a few others on AA and he comes in taking the troll's side. =/ Real nice guy.

So you can find out what hidden plugins a server has by what a staff member DOESN'T have? =/

Layfon - October 8, 2011, 3:01 pm

Well yeah sure, But I know him at least well enough to say he isn't really a troll IRL, or when you get to know him properly.

And yeah, I could do tests and determine it. (ofc plugins are there for a reason)

Unless Fox does Java and codes and stuff and makes his own plugins.

Oh sure! In real life, he may be MUCH more well mannered and whatnot. I bet a lot of us act much differently on the internet than in real life anyway. But online, he's still a troll in my eyes.

Isn't there like hundreds or thousands of plugins?

Layfon - October 8, 2011, 3:03 pm

Btw I am saying this with my knowledge on plugins I have tried, ofcourse If I see something I would know. And I don't know how many plugins there are, but I know the popular and most used ones. And no where near hundreds of thousands lol.

And if in your eyes he is a troll, doesn't make him a troll. Because in my eyes he is pure epicsause. Even if ratio is like 1:25

Yeah, but it'd still be difficult. And there's TONS of room for error.

Well, opinions differ.

Layfon - *October 8, 2011, 3:14 pm*

But the reason it would work on AACraft is because Fox isn't trying to make it anything fancy, There are less plugins, and they probably wouldn't have that many as you think they would anyway, because too many can cause lag, and errors (for example plugins on the same thing, overlapping maybe?, wrong version, whatever)

Fox - *October 17, 2011, 12:23 am*

Thread reopened. I won't reset the map anymore but I do have some logging plugins.

If you meet all the requirements, please PM me if you want to play on the server.
