Kappah - October 2, 2011, 3:23 pm

This is one of the best and stable RATS I have ever used guys.

Once we update to 3.0 the price will go up, so buy while it's this cheap!

SkyRider - October 2, 2011, 3:26 pm

i have this rat and yes is one of the best i have used and it is stable as fuck nice job bro?

Coding4Noobs - October 2, 2011, 4:08 pm

any suggestions for more features? i might open a thread for it but for now jus post here

SpreadBoss - October 2, 2011, 4:16 pm

Looks awesome.

Pmed you already ^^

VisionZ - October 2, 2011, 4:17 pm

I think it is nice, but we all need to relax on the RAT coding, HTTP Rat coding, only because everyone is loosing money lol. But it looks good.

I'm the reseller bro, I have it.

It's the most reliable rat I've ever used, not just saying that because I sell it, I sell it because of that reason.

I wouldn't sell bad programs and have my marketplace rep dropped.

And right now, the Remote Desktop works fine, it's just his site that is down. He's buying a VPS to host the Bug Reports, Chat ect.. on so everything will be 100% in a few hours or tomorrow.

If there are any other questions, feel free to PM me.

What?

Yesterday I using it and it loaded every 1.5 seconds. It's probably you or your bot's connection man.

Go try a speed test real quick.

PS:When I had myself RAT'd it loaded instantly, so try using your RAT on yourself, if it loads fast, then it's obviously your or your bots' connection.

Obv when you are ratting yourself you are gonna get it instant because you are connecting to yourself...

It's not either, my internet speed is good and on all my bot connections it loads slowly.

In my opinion : Features > Website

The features you are going to do are more important than the website, because it makes your rat special. ?

I am also currently setting up my account for nVpn but have a quick question, I use a sprint air card to connect to the net while I am at work and my home connection (dsl) at the house. Will I need to update my info with nVpn each time I use my air card to use the rat? Sorry for the ignorant question but want to make sure I set everything up correctly from the start.

I'm not sure. You would have to ask the Nvpn support team. I will re read this message once I get home to make sure I read it right but if it does have anything to do with updating info on nvpn then I cannot answer that.
