Do you have an unactive forum?

Do you need more posts/threads/topics/replies?

Do you want this done cheap?

You've come to the right place! I'm posting in your forums/websites 20 posts for 1\$ or we can negotiate prices!

Leave your forum name here/ Or pm me!

I won't go first unless you're trusted.

Thanks! First service gets half off! What a deal!

this is getting out of hand . lol

first selling sigs then posts?

whats next?

Should be in service offerings, not this forum. I think, but still, not a bad price but you need some kind of way to prove it's not just gonna be spam.

I have a job im just doing this to help out other people while making a small amount of paypal money in the mean time i really have nothing better to do when im at home at night so why not? They can look at some of my posts and tell its not spam, but if they were really worried about it i would do the posts first so they would be able to tell if it was HQ or not. Or i could do a few HQ posts before even talking about payment to show im legit.
