This is a tutorial on how to change eye colour on Adobe Photoshop CS5.

Step 1. Select Lasso Tool and hold shift and highlight the eyes.

I hope you enjoyed the tutorial and thanks to all of you ?

And here is an example:

Not the best tutorial, mate. If you are to use this method, select parts separately and do it carefully by zooming in. You got some of the eyelashes. Personally, I think the example could have been better.

This is just a quick tutorial guys, I did it quite quick. At least you understand it.

I'm talking about the right eye (Her point of view, not ours). I noticed a little haze that looked outside the eye, and I zoomed in a bit and it still looked like it was glowing outside.

This a rough picture. I can post a much better picture. This is just a damn tutorial not a 'Rate My signature' section lol

Changed her eye colour:
