

Forum:[Hack Forums](#)

Thread: [Tutorial: Set up your own irc server, plus working botnet tutorial.](#)

A???????? - May 23, 2008, 12:35 am

[DOWNLOADS!!!!](#)

Code Username: [www.sub7legends.com](#)

Password: Adf67HjpmH (case sensitive)

Password to unzip: [www.sub7legends.com](#)

(if its different, ask me and i can get the new one)

1. goto the download section and download IRCPlus 1.5 Crack (comes with both needed files.(Will say it didnt work))

2. goto the download section and download mIRC 621 .

User and serial for mIRC ([Click to View](#))

User: [www.serials.ws](#)

Serial: 12010-1205142

3. INSTALL BOTH PROGRAMS

4. goto <http://www.no-ip.com/newUser.php> and create a Host redirect its free.
example sub7.no-ip.biz .. they also have others to choose from .

5. goto <http://www.no-ip.com> and click on DOWNLOADS to download your No-IP DUC (No-IP DUC (Dynamic DNS Update Client)). this is the tool that updates your ip address.

6. OK now run IRCPlus press the configure button . Now click on general settings Now.. next to servename put in your server that you created at <http://www.no-ip.biz>.. Example sub7.no-ip.biz ok now close the program and run it back up.

7. Now Run these 3 programs mIRC,Dynamic DNS Update Client and IRCPlus

8. Now update your ip address on the Dynamic DNS Update Client check the box next to your server name .

9. Now goto mIRC .. look up at the top left . Click "File" then click "select server"
look to the right and Click "ADD" next to Discription put in whatever u want.
Next to IRC server put in your server name that you created at no-ip.com
Now click "select" Now click Connect to server. NOW you should be connected to your server.

10. NOTE. sometimes when you use mIRC your old ip address stay's ..I sometimes change .biz to .big then try to connect then change it back.

11. Open sub7 look to the top right you will see "ip" click that next to host name put your server name from no-ip.com now click resolve host name ..this will display your ip .. make sure it is the same ip that is on your Dynamic DNS Update Client .

12. YOU SHOULD NOW TO ABLE TO CONNECT TO YOUR SERVER, IF NOT POST YOUR

QUESTION.

Most info taken from
Where did I get this? [\(Click to View\)](#)
[Here, thats where =D](#)

Working botnet [\(Click to View\)](#)
After that
Make sure you do this (Some nice hacking)

A????????? - May 23, 2008, 12:49 am

He said about that irc here:
<https://hackforums.net/showthread.php?tid=17804>

Anyways, thanks for share...

A????????? - May 23, 2008, 12:59 am

Actualy his was about sub7
Mine was teaching how to make a irc server.
and a botnet.

Anti-Anti - May 23, 2008, 5:16 am

Alright, everything was going good up until step 9. I can't seem to connect to my server, I've followed the guide step by step and when I get to step 9 it just won't connect. Any ideas?

jacknits - May 23, 2008, 5:59 am

ok sweett thats good to know ty

A????????? - May 23, 2008, 3:06 pm

go to 192.168.1.1 in your browser, enter your password.
then enable the ports you are setting it up on.

Anti-Anti - May 23, 2008, 3:39 pm

starwiz Wrote:go to 192.168.1.1 in your browser, enter your password.
then enable the ports you are setting it up on.
I figured that's what it was :P

Anti-Anti - May 23, 2008, 4:36 pm

Well I went into my router and opened the ports or so I thought, it's what I usually do when I need to open a port.

But now all it's doing is timing out, the connection just keeps timing out over and over :/

Any idea of what I'm doing wrong? I don't think I'm opening the ports right, though I swear I am, it's not my first time fooling around with stuff like that.

Jake13 - May 23, 2008, 4:54 pm

Port scan yourself. xD

A???????? - May 23, 2008, 6:55 pm

Lol.....

TAKE UP SPACE

Biohazard - May 24, 2008, 7:06 pm

<http://sub7legends.com/downloads/mirc621.exe>

Shadow master - May 25, 2008, 5:03 am

yeah.. i m looking for it :D

A???????? - May 25, 2008, 11:43 am

Biohazard.

Why did you post the link?

:P

A???????? - May 27, 2008, 12:02 am

Bump

I think its usefull.

V41kYRi3 - May 27, 2008, 12:11 am

Is this still working starwiz? I'll do it tomorrow.

You gotta be sure its working or else im gonna be the one to kill some bitches. ?

A???????? - May 27, 2008, 12:29 am

Works for me.

Tested on my and my dads heheheheheheheh

holavercetti - May 27, 2008, 1:59 am

nice tut m8

A???????? - May 27, 2008, 2:32 am

Thanks!

I try :O

slayeraeb - May 27, 2008, 6:18 pm

thanks alot

cokeisfornoses - May 28, 2008, 10:42 am

12. YOU SHOULD NOW TO ABLE TO CONNECT TO YOUR SERVER, IF NOT POST YOUR QUESTION.

ya...well there's the one problem i ran into

sub7 has this as the destination 24.187.119.140 and this 27374 as the port

when i try to connect it just tries and tries and eventually says disconnected. I even have the port forwarded and it still won't work...along with 6667 forwarded

and when i ping my ip under the ip button in sub7 it says

sending 56 bytes to xxx.xxx.xxx.xx...

received 56 bytes from xxx.xxx.xxx.xx in 16 msec

so i'm confused, and help is greatly appreciated :)

I am using the apple timecapsule 500gb if that makes a difference and uhh yep... so my question is why am i not able to connect to my server?

thanks ahead of time for helping me out :)

A???????? - May 28, 2008, 10:23 pm

When you set up sub7, make sure it is set to connect to your private server, and on the proper port. Post again if it didnt help.

cokeisfornoses - May 28, 2008, 11:53 pm

dang... i set my destination as jkdizzle.no-ip.biz which is my irc server and port 6667 now i think it's the right port but it keep saying looking for sub7 server and won't stop....i don't know why this is?

h4x\$3r - May 29, 2008, 4:30 am

thanks for this starwiz, great tut!

A???????? - June 1, 2008, 11:50 pm

Thanks!

Im hoping to make more :P

A???????? - June 11, 2008, 5:23 pm

Bump

kira.hacker - June 12, 2008, 5:51 am

yup thanks alot its a nice tut...

A???????? - June 12, 2008, 11:34 pm

No problem.

Seems to work nice :P

RedruM - June 19, 2008, 1:54 am

Everytime i try to connect to my server it says "unable to connect to server." I portforwarded everything i dont know what is wrong. Someone help?

mags - June 30, 2008, 10:02 pm

ok first ty for the tut very helpful :)

im having a problem connectin to the server though through mirc in step 9. I can connect to other servers and channels thru the same port...just not to the server I made at no-ip.com It says its up and running and everything else is a go... any ideas?

A???????? - June 30, 2008, 10:26 pm

Umm... Can you explain it a little better?

:P

mags - July 1, 2008, 4:29 pm

K...

I open mIRC,Dynamic DNS Update Client and IRCPlus... IRCPlus shows the server is good and

running...I clicked the box on DNS Update and says no update needed... Obviously the server is working... I open mIRC, add the server as you state but I cannot connect to it...

So...I close everything out...reopen mIRC...and try a random server...and I connect with no problem--I was checking to see if it was my port that wasnt open or if it was the server... I used the same port to connect to mIRC random server and channel as I did when I tried to connect to my server and I had no problem connecting. So I have no idea what to try next... Perhaps make a different server? Maybe the no-ip.com is the problem? Any help is greatly appreciated...I'm trying to read up on this as well as asking questions but there arent many tuts on this kinda thing...tryin to take this step by step :) ty again

Calle1337 - July 2, 2008, 12:01 pm

at sub7seven you can get some pretty heavy trojans (to use,not infect you)

A???????? - July 2, 2008, 3:47 pm

Calle1337 Wrote:at sub7seven you can get some pretty heavy trojans (to use,not infect you)

What a useless post.

This has NOTHING to do with an irc server.

hiimnew - July 7, 2008, 5:20 pm

is there any new info to why the unable to connect to server error comes up or a way to fix it ?

A???????? - July 8, 2008, 1:27 am

Did you do the single port forwarding?

hiimnew - July 8, 2008, 6:24 pm

i have a old pc i use for this and when i tryed it i had pc going strait to the modem so no fire wall or anything and it still did not work got connection refused or something like that any more info on this would be great

Metalhed - July 10, 2008, 4:40 pm

mIRC won't connect to the server I made at no-ip. Uhh, everything else seems to be fine, except that. Help?

I can't even connect to a random server.. it said, connection refused.

Then tried another, and said connection timed out.. What to do.

Metalhed - July 10, 2008, 5:23 pm

bump for help plz

IgorEvnoKic - July 11, 2008, 1:31 am

Same sort of problem with me, too. I can connect to a select few servers on port 6667 but not my one at no-ip (Connection Refused). So I don't think port 6667 is closed or anything, but then again I'm confused. Any help?

Edit: Could it be that I haven't configured the host at no-ip properly? I didn't see any settings for it listed in the tut. so I just set everything as default. Not sure if that's correct..

JoshuaXiong - August 17, 2008, 7:16 am

How do you make your own IRC Server?

It seems like my IP is changing on the IRC Server :P

How do you port scan yourself?

MillerLite - October 11, 2008, 6:42 pm

new login info

Username: www.sub7legends.com

Password: PcKn66FFgVQj8b (case sensitive)

Password to unzip: www.sub7legends.com

Inferno - October 12, 2008, 3:06 am

thanks starwiz i was looking for something like this

k3v1nv - October 12, 2008, 7:34 am

I can't find the mIRC files on that site that you tell us to download..

Could you be more specific on that part?

Thanks in advance,

Ph4NTÃfÂ,M

loreplayer - October 18, 2008, 2:23 am

The password for sub7 downloads doesn't work :(

Execute - November 16, 2008, 3:21 am

SORRY FOR BUMPING OLD THREAD BUT I'VE SEARCHED EVERYWHERE AND NOTICED
THREAD CREATER IS STILL ACTIVE SO...

I keep getting 'Unable to connect to server (Connection timed out)'

Why do I KEEP getting this, my port 6667 is open

Thanks x

EDIT: i'm now getting this error 'Unable to connect to server (Socket operation on non-socket)'

Impaq - December 17, 2008, 12:49 pm

Its not that old of a topic and i'm kind of happy you bumped it.

My Question:

You said "Make sure your ports are forwarded correctly."

And I was wonder what exactly are the ports that need to be correctly forwarded?

1-800-you-fail - December 21, 2008, 12:42 pm

since everyone have the same stupid problems why not make a video tut about this step? please?..

Leylaa - January 11, 2009, 8:59 am

Stuck to 9 when i try to connect to the server it says "unable to connect to server" i forwarded the
port 6667 but still nothing i change dns update client still nothing can you help me?

waxus - January 13, 2009, 4:49 pm

thanks man nice post

ddosmasterr - January 31, 2009, 4:37 pm

i did all that but when i click connect , it allways says

unable to resolve server

help please

(Jan 31, 2009 05:37 PM)ddosmasterr Wrote: [\[CITE\]](#) i did all that but when i click connect , it allways says

unable to resolve server

help please

it does the same to me to

xX CM31 Xx - February 3, 2009, 4:16 am

SORRY FOR BUMPING OLD THREAD

but the login info doesnt work anymore would any one like to upload the sub7 files to rs or mega?
or atleast post new info seeing as i need it and maybe so others to (trying not to sound self fish)

or provide another place to get the ircplus(and crack) and the mirc files

HardOwned - February 3, 2009, 7:15 am

Still works, very nice.

stickynipples - March 12, 2009, 7:42 pm

when i go to conenct i get this error :

No Authorization for this server

- [10053] Software caused connection abort

-

Disconnected

Stefanthechunk - March 22, 2009, 12:45 pm

the password for sub7 wont work , i cant download the files

Mr.Le - April 3, 2009, 5:23 am

'Unable to connect to server (Connection refused)' this my problem. Please help me!

Goller - April 3, 2009, 8:13 am

(May 23, 2008 05:16 AM)Anti-Anti Wrote: [\[CITE\]](#) Alright, everything was going good up until step 9. I can't seem to connect to my server, I've followed the guide step by step and when I get to step 9 it just won't connect. Any ideas?

I think you also need to portforward if your behind a router..

qwertylol - April 21, 2009, 10:27 am

The crack doesn't works?

aMoKen - April 22, 2009, 1:42 am

(May 23, 2008 12:35 AM)Nyx- Wrote: [\[CITE\]](#) 11. Open sub7 look to the top right you will see "ip" click that next to host name put your server name from no-ip.com now click resolve host name ..this will display your ip .. make sure it is the same ip that is on your Dynamic DNS Update Client .

o.O I didnt download any program calld sub7.... ? what do u mean?

btw thx dude its nice guide ?

Dfox - April 24, 2009, 3:41 am

Yes Nyx, please get a new password and user for sub7 downloads

Cold_KillerSidd - April 26, 2009, 10:14 am

pass not workin Nyx =/

iBRSteven - May 2, 2009, 7:52 am

hmmmmm could u plz update the password and username

Legym - June 9, 2009, 1:19 pm

Username: www.sub7legends.com

Password: ASv67HI8b33x(case sensitive)

Password to unzip: www.sub7legends.com

They change the password after so many months.

HAs anyone got the IRC server working?

seehawk - July 21, 2009, 1:38 am

the pass you provided does not work

[B]iishop - July 21, 2009, 3:16 am

pass doesnt work anymore :(

Jolty - July 21, 2009, 5:30 am

People who cannot connect use 127.0.0.1 for the server in Mirc then you will connect. ?

mrhub - July 21, 2009, 9:16 am

Jolty you are my Fuckin hero, thanks so much

sanitarium6996 - July 30, 2009, 5:27 pm

Here's the new pass:

Code Username: www.sub7legends.com

Password: TgvasDAy7mxV (case sensitive)

Password to unzip: www.sub7legends.com

Oxidium - July 31, 2009, 3:18 pm

(Jul 21, 2009 05:30 AM)Jolty Wrote: [\[CITE\]](#) People who cannot connect use 127.0.0.1 for the server in Mirc then you will connect. ?

Thank you so fucking much. I love you. (no homo)

reminda09 - July 31, 2009, 6:32 pm

nice tutorial thank you

Awcdfri - July 31, 2009, 10:12 pm

Nice job on tutorial thanks.

XsizoX - August 9, 2009, 6:29 pm

why does the serial does not work :(

Sorry if this thread is old or does not work :)

Brandon- - September 8, 2009, 6:24 pm

Requesting some help. I have everything setup right, I followed the tutorial, but my bots won't connect to my server...They connect to other servers so its not my script. Something is wrong with my server.

pabullo - September 9, 2009, 6:05 am

thxxx for the tut .. but serial key wrong..

C4Xplosive - September 9, 2009, 2:32 pm

new details :) yw

Username: www.sub7legends.com

Password to unzip: www.sub7legends.com

XsizoX - September 12, 2009, 7:35 pm

is this liget? - does it work? thank you :D

Johnsonnnnn - September 12, 2009, 9:09 pm

greaatttt tut

to short

CheeseCakeMan - September 19, 2009, 2:10 am

Can someone help me, when I try to connect to my server this is what I get

<07:09> Connecting to wonderbot.serveirc.com (6667)

-

<07:09> Unable to connect to server (Connection refused)

Raykoid666 - November 29, 2009, 9:08 am

[http://www.sub7legends.com/](http://www.sub7legends.com) is dead, any alternatives to still make this tutorial work?

incorez - November 29, 2009, 11:02 am

will try this out, thanks

Devious - December 10, 2009, 9:27 am

Would love to try this! Please up link. :D

R3CkLeSs - January 2, 2010, 5:48 pm

yo i got it up but i dont have ops and idk im just guessing but its not rly online cuz i cant get some else via teamviewer to connect. im tryin to make a server where my bots well unixs can connect cuz ive just been payin for the server so far. some help would be appreciated, thanks

theanonymousguy123 - February 4, 2010, 10:54 pm

Thanks bro. very nice.....

Emo™ - February 5, 2010, 4:10 pm

woooow. hate to be a buzz killer, but this is a good way to get yourself caught. just use a vps<virtual private server>

Sterios - February 7, 2010, 8:59 am

It looks good, thanks

The Punisher - February 8, 2010, 11:25 am

Thanks Man Very Good.

Flawless - February 12, 2010, 9:10 am

incase anyone else couldnt find a link for sub7 <http://www.hackpr.net/~sub7/downloads.shtml>

kernel87 - February 12, 2010, 9:13 am

Thanks ... it's work

KickIT - February 13, 2010, 1:23 am

Great tut. Thanks.

Been trying to setup my own for a while now never knew how to.

honda - March 31, 2010, 8:42 am

rdiak you selling poker chips

Syren - April 16, 2010, 2:38 pm

for the irc server, do you have to open a port on the router or something?

NotAk-47 - May 2, 2010, 12:18 am

why cant i connect to my irc server i set it up.

black hatter - May 7, 2010, 12:12 pm

please drop link :))

Irion - May 25, 2010, 7:45 pm

Well, nevermind. I restarted my router, and it's all good !

Just a big thank you, I'm already on your botnet tutorial, everything is so clear !

Thank you again !

achillesmarcus - May 26, 2010, 5:39 am

Hi! Everybody i want to have a botnet of my own in my lab can any body help me how to go about it, assuming to have a secured network of 3 physical PC linux or win based with 2 VM guests, Plz recommend the bot and how to install and have a irc server running to have a botnet.?

Drooly - June 8, 2010, 10:06 pm

The link for IRCPlus 1.5 Crack is not working.

ibotter - June 8, 2010, 10:58 pm

yes the download link isnt working

ntenege - July 3, 2010, 10:08 am

anyone confirmed this tut's still working?

Sh1Ft - July 3, 2010, 6:32 pm

Thanks for the tutorial :D

versx - July 9, 2010, 11:36 pm

new download links would be appreciated please :)

Droopy123 - August 16, 2010, 6:14 pm

Confused, think you could help me sometime?

Pvsxe - August 23, 2010, 6:29 am

i can't connect to the server it says:"unable to connect to server (connection refused)"
(ports are open) hope u can help me..

wous - February 14, 2011, 10:50 am

<http://www.sub7legends.com/index.php?action=fulldownloads>

Link doesn't work

uuuuuyyyyyzzzzz - February 17, 2011, 10:57 pm

very nice tutorial..

really useful :)

Xpl0de - February 24, 2011, 10:36 am

thanks for the walkthrough. worked like a charm ;D

grodt - January 12, 2012, 1:16 pm

How to setup SpyEye 1.3.45 ?

Can you PM me if you can setup it ?

Please help meg to setup !

Can some help me to setup SpyEye ?

Please help me !

PM me :)

s4mb0 - January 12, 2012, 3:13 pm

Very nice Tut, thankyou. Got it all sorted

Anonymous6562 - March 15, 2012, 12:36 pm

What a shitty tut fuck u wanker g and die

FoBiK - March 16, 2012, 4:37 pm

thanx for this bro you the best for making this

?Ladon Kkc - March 23, 2012, 10:09 am

Thanks for the tutorial comes in handy setting up a irc botnet in the future...:)

eggsecutor - March 24, 2012, 2:20 am

Thanks for the great tutorial. Greatly appreciated.

Didn't even notice the date but thanks foe maybe updating tutorial

Knightmare. - May 28, 2012, 10:25 am

I am really needing to find c++ 6.0 so if you can please update. Thank you.

EMPIRERAIDER - July 26, 2012, 9:25 am

This is a good tutorial keep it up

Thanks

EMPIRERAIDER

Black!HatCat - July 30, 2012, 1:12 pm

Heho community:) ? I hope someone can help me . At the moment i try to install an IRC client on my Linux Vps. I use Centos so I want install unrealircd, but a friend of me said, thats better to use "Imfao - IRC" . The most here are backdoored ;) What did the Profis said about that ? ?

regats and thanks in advance ?

1337B345T3R - August 2, 2012, 4:01 am

Hey, so does this server run off your home connection? Does your PC need to be running for it to work? Thanks

(UFC123) - September 8, 2012, 2:24 pm

hahah nice post helped a lot thank you, ...

?ikism? - October 23, 2012, 9:06 am

Nice tutorial dude.

But is there other options then sub7legends? Do I really need it?

Cause there's no way to get it :(

shadowman0128 - October 23, 2012, 9:24 am

Thanks for the information it really helped

Haynes - October 23, 2012, 11:58 am

Sweet guide thanks gonna use now myself ;)

Light Yagami. - October 23, 2012, 4:07 pm

nice tut bro this well help out a lot of poeple

Aid - October 29, 2012, 5:18 pm

Lmao thread from 2008 brought back, thats hilarious :)

Critical_Hax - November 3, 2012, 4:35 am

Bro, Where are the downloads? If I press "DOWNLOADS" I get on www.sub7legends.com but where to download the files that you got to download?

mw3killer - November 3, 2012, 6:07 am

Thanks for the tutorial! It really helped me set up my botnet.

innocent89 - December 24, 2012, 10:15 pm

Downloading link not working... plz provide me new one to go through ur TUT. Thnks

I Am A God - April 24, 2013, 3:46 pm

wow nice man. Good work and nice thread.

gbpuki - April 25, 2013, 8:46 pm

this is kool.. helpful for the new ones

Spoorloos040 - April 26, 2013, 2:52 am

Can I build a botnet for bitcoin farming this way?

imahacker97 - October 16, 2013, 6:56 am

Sub7legends doesnt work anymore :/ could you make a more updated guide?

Rapierz - October 28, 2013, 6:05 pm

Nice one! I Cant set it up though, i'm using a USB modem

nicodim - March 17, 2014, 8:13 pm

Great info . thanks for the tutorial !!

xXxAlphaxXx - June 9, 2014, 2:53 pm

Thanks tutorial helped me out a lot :D

Landchester_Turtle - December 4, 2015, 5:54 am

Would this still work if I'm trying it now?

lamsheyyar - December 13, 2016, 3:45 am

I'm a newbie as well.. Is this guide still working? links are down :/

MycomplexAccount - December 14, 2016, 6:56 am

Thanks for this post, I'll take a big look at this when I have the time for it :D

Muhaha xD

- Edit: I through this was a new post... -.-
