Thread: [Nav bar has partial titles?](#)

Dread Pirate Roberts - October 4, 2011, 9:29 pm

This is what I'm talking about:

When you scroll over them, you get a title text.

The current titles are:

Home = Hack Forums

Upgrade = upgrade your account

Follow = twitter

Contact = contact

I was just wondering why Help, Member List, and Search don't have titles?

Bean Dip - October 4, 2011, 9:31 pm

In all fucking honestly, do you really need the titles?

CoNsEqUeNcE - October 4, 2011, 9:33 pm

They are called tooltips. And they are not entirely important. The pages they link to still work right? Then there's no problem. I'm sure Omniscient is already aware of this. Requesting thread to be closed.

(Oct 4, 2011 09:31 PM)Noid Wrote: [\[CITE\]](#) In all fucking honestly, do you really need the titles? It's not a necessity, but some do, some don't. Was just asking for an explanation?

Bad Blood - October 4, 2011, 9:40 pm

I'm guessing that it's because Omni felt there was no need to add them. If you're smart enough to get on this site then I really don't think they're necessary.

Your crazy, no one on this site is smart enough.

Daniel Faraday - October 4, 2011, 9:43 pm

They don't show in Opera or Chrome anyway. Your suggestion isn't really that important.

Daniel Faraday - October 4, 2011, 9:47 pm

(Oct 4, 2011 09:44 PM)alabama Wrote: [\[CITE\]](#) Am I suggesting anything? Na. Read the thread over again.

Oh, and I am on Chrome, your advice sucks.

Are you Omni? No. I'm asking for an explanation as to WHY they DON'T have any.

>implying bringing up the fact that half of them don't have titles is not implying that they should all have titles.

No Tool Tips:

The logo has one, but none of the links in the headers do.

Dread Pirate Roberts - October 4, 2011, 9:49 pm

Because you're mousing over the text, not the picture corresponding to the text.

The thread was made for an explanation of the topic, no reply from some normal member is necessary, as you did not design nor set up the website, nor do you know the answer to my question.

Also, if it was a suggestion it would be posted in the Suggestions forum.

Implications aren't suggestions, they're implications. I was mousing over the image, and the text does not display. Why don't the rest of them have them?

(Oct 4, 2011 09:54 PM)alabama Wrote: [\[CITE\]](#) Because it's probably your browser. Why would there be html tags for every line?

There wouldn't be. I was showing you how the title attribute works.

Omniscient - October 4, 2011, 11:43 pm

Just not added to the HTML that's all.
