Okay as ALL of you heard of Anonymous taking down Facebook, Well here's your answer, NO we are not.

The person who said it was a rouge Anon, And he worked by his self, Why would we take down facebook when we have a BUNCH of groups on there and we spread the word on there, So don't always believe what you hear.

Randi ZuckerBerg stop the Censoring of Anonymous on Facebook and Apologized already.

Mytre - October 5, 2011, 3:14 am

John™ - October 5, 2011, 3:22 am

I do speak for all Anons, I have seen some try to take it down, But failed, I asked a couple of People from Lulz Sec and they said it was a rouge Anon, So yaaa.

Actually it's fairly easy using LOIC, And getting hundreds of people to help.

You don't speak for all Anons..you're a fan.

Also They couldn't take down Facebook.

There is no such thing as a fanboy of Anonymous.

And go ahead and think what you want to.

Chrisayan - October 5, 2011, 3:26 am

Yes this will be happening you idiots.

Mytre - October 5, 2011, 3:26 am

You're so buttfuckingretarded, lol.

It's impossible for one person to speak for all of Anonymous. And Lulz Sec I believe was disbanded recently.

Either way, if they weren't, you're a wannabe.

Code ping www.youtube.com

74.125.XXX.XXyeah lets hit them with teh l337 laz0rz.

Unless They have a MASSIVE ability to DDOS all of Facebooks servers or manage to actually exploit the servers and shut it down this isn't happening.

Negative (-3): Pretends to me some anonymous fighting for rights when he's just a little fanboy.

VisionZ - October 5, 2011, 3:50 am

You do not speak for Anonymous, and there is no "WE" so you really don't know what your talking about, and you only speak for yourself not for everyone. SO GTFO.

Lounge - October 5, 2011, 7:38 pm

Why do you speak as if you're speaking for all of Anon? Don't think you're even in the same league as them. You're just a little fanboy attempting to get recognized on a website and then be all high and mighty. Leave HF right now kid.

facebook = 60k servers = handles over what was it 300mill users a day? yea good luck getting just "a couple hundred people" as you said using LOIC to take it down hmm 200-300 people using LOIC with a few hundred to a few thousand slaves != the amount of power needed to take down a farm of servers that handles what was that number again.. 300mill users daily. and again i highly doubt just a few hundred people can have a total of 300mill+ slaves combined.

Sad_Angel - October 5, 2011, 8:26 pm

So you know someone called sebastian Michaelis..right?

Ariana Grande - October 6, 2011, 3:10 am

This was originally only planned by a FEW Anonymous members, and then it turned in to a plot to

dox other Anonymous members. (See Operation #RefRef)
