Thread: [Need the java loading thingy in .gif](#)

Krizz - October 6, 2011, 4:47 am

Just need a GIF of the java icon with that circular loading progress animation. Used to have one on my comp but must have deleted, and amazingly I can't find anything like it searching. Been looking for a while.

I believe I got my previous one from this forum somewhere, wondered if any of you had one.

Found a still of it, basically need this but moving

Thanks in advanced.
