Themes For Sale

Spoiler ([Click to View](#))

THEME #1

What You Receive

When you purchase these themes, you will receive the full source code that is related to this theme, you also receive the rights to edit the theme to your satisfaction, but you have to supply credits to me when you use the theme. Keep in mind, these themes were done with Aeonhack's theme base 1.5, so if you wish to upgrade it, either contact me or feel free to do it yourself :)

This would be best used for some "blackhat" programs like rats/stealers/etc, because the dark theming goes well with underground stuff ?

What comes with this theme?

I think you have to give 50% To Aeonhack, Cause you would never create a theme like that without base.
