Thread: [100+ Userbars Up for Grabs - Made by Me \(taking requests\)](#)

**dafatman** - November 7, 2009, 2:33 pm

[img]<http://i260.photobucket.com/albums/ii36/dafatman62/userbarthreadban.png>[/img]

So, I finally decided to do this just because I was bored. I put them all in big images because of the 10 image-per-post limit. I don't think this forum uses userbars much, but I don't really care. 99% of these were requests, so don't be pissed at me if there's something in there you don't like. ?

Feel free to use any of these as you like. Just post here indicating which ones you want the image url for. I'll either post them here, or PM them to you. You may also post requests in this thread, and I will get to them when I get to them. ?

And before anyone asks, yes, I made all these. ?

It isn't one of those who said that? things...It is just sort of common sense. Don't take that the wrong way. They are good.

They just defeat the general purpose.

They just defeat the general purpose.I realize that that was a poor post, sorry. I just didn't think I had time to edit, so I wrote something quickly. Didn't mean to make it that sassy. ?

Most of the requests I get are for group/clan userbars and they usually want them to stand out. I just add elements that I think will do that. ? I realize my style may stray from the norm, but some people like that.

Somewhat recent ones:

I won't do .gifs if that's what you mean... I can do just a picture of dudes dancing, but you'll have to give me an example of what you want as a render so I don't get it completely wrong. And technically this is a userbar thread. ;)

What do you mean by 'stats'?

Do you still want the userbars you requests via PM? ?
