Thread: [Oil Text Tutorial](#)

**Reminiscent** - October 6, 2011, 9:58 am

Here it is. Requested and delivered.

Sorry it got cut a bit.

Cant fix it though cause i forgot to save the psd

**Flying Dutchman** - October 6, 2011, 10:19 am

Nice tutorial, simple but informative. I've added it to my compilation, if you don't mind?

**Uzi?** - October 6, 2011, 10:31 am

Oh, this is how you do it.

I had a feeling it was a font instead of a pentool,

Nonetheless, nice little tutorial - well done broskie. :)

**Stevo** - October 6, 2011, 11:20 am

Very nice tutorial, couldn't seem to find the font so I used a different one and thought I'd be a little different haha.

Here is my shot

**Reminiscent** - October 6, 2011, 5:40 pm

@the flying dutchman no i don't mind.

@uzi you could easily take a regular font and at some drippy brushes to it or use the pen tool and get the same effect.

@stevo lookin' good bro

**S?kid** - October 6, 2011, 8:52 pm

Noce but where is the gold tut you promised me

**Whats a username** - October 25, 2011, 7:31 pm

I followed this perfectly and double checked and i'm using the same font and i still cannot seem to get it right ?

**iLOLZ** - October 25, 2011, 8:45 pm

Thanks! I will have to try this out sometime!

Try lowering the layer fill to 0%

That should work

Custom make it.

Click on the contour square to make a new one.

There is a tutorial for this exact text effect on a PS tutorial site out there. Did you take this from them?

**Reminiscent** - *October 29, 2011, 1:05 am*

I sure didn't.

I made this 100% from scratch.
