Thread: [SLH, bullshit, or legit?](#)

awestom - October 7, 2011, 5:38 am

So I would like to know if SLH is actually bullshit, or whether it is real.

Please provide proof to back up all your arguments.

I don't see how it would work... I'm not saying it doesn't I'm just saying I don't understand how it would, so I would consider it highly unlikely...

I also don't think it is legit. [H]ell provided a explanation.

[H]ell - October 7, 2011, 6:16 am

I cant even see why people would even CONSIDER this being even real.
If I didn't had vuzia to keep me here, I would leave this forum.

People consider a 12 year old hitting is head on the keyboard, making up imaginary shit, a respected hacker.

And consider the fact that it might be real.

This shit is as real as pokemon flying to space and beyond..

A lot of people say it isn't real, but I've only seen one bit of proof against it, and I've seen other people claim it's real.

What the fuck makes you think some bullshit like SLH is real?

Seriously, you know ape shit if you consider this close to being realistic.

I wanted a reasonable conversation with others about this "new" type of hacking, in order for me to make my mind up.

If you don't have anything construction to say, please leave.

I have already read your ONE thread on why this isn't real, when I have seen multiple other threads saying it is real.

If you went through and refuted each of those other threads in a reasonable way instead of swearing and insulting people, then maybe I would take you more seriously.

Anyone who thinks this is real probably needs to leave the forum and not come back. This is even more obvious than the UDPLoris joke.

Screw this, people can't have a proper discussion here, can they.
