Thread: [Msn Bot Help needed](#)

Blazin - November 8, 2009, 12:31 am

Hello, I have downloaded that msn bot version that was leaked. Yeah I know it's not mine, nor Am I Taking credit for it.

I have set it up on my dedicated server, and I'm Having A Few issues, I Was wondering if anyone could help me.

First off, I Have it logged into msn... I have it as the nickname i Want... and it's freezing e-mails correctly, However everytime I Run it... It dosent auto connect to my IRC, i have to manually do it. I Do not see anywhere in mirc.ini where it shows "Channel" .. I mean... why does the Bot need to be in an Irc channel... could somone tell me? I Would like to set it up so people have to be in the irc channel for the bots to work...

If anyone could help me i'd greatly appreciate it.

Link to program. Pm it to me.

pushl %ebp - November 8, 2009, 12:35 am

I thought I had that bot, can you tell me the thread it was on? Pm me thread for bot please.

Blazin - November 8, 2009, 12:48 am

Well can you guys help me out with it? :P

Mr Kyle - November 8, 2009, 3:34 am

Lots of leaked bots contain some rats binded also the old version that was leaked is full of problems and glitches. I recommend you buy admin access as you PMed me
