Nice :):) an you make a website yours??

haz3d - October 16, 2011, 1:12 pm

Wow this actually looks nice. Thanks for this.

BROLY! - October 16, 2011, 3:50 pm

File is infected. EXE Differs in size from the real exe.

Virus don't download. Hopefully staff will still take it down even though it's a few months old.

Firstly, "Delete and remove", it does not mean anything. And, you say that it is an infected file without any "proof". Also, the download link if from Mega upload, it means that the download link is not working anymore.
