I'm pretty sure, AeonHack will awnser this better, but basicly what this theme does is give ur application a theme pretty self explanatory

When you create a .Net application you are limited to the default controls they give you - such as the TextBox, Button, etc. These are additional controls you can add to your project which are themed as you see in the screenshot. It just makes your program look much nicer to help increase sales.

Theme is great. Would like to see a few others controls added to complete the theme. Tabs, Tree/Listview, Combo/Listbox, NumericUpdown, and scrollbars (Horizontal, Vertical, Both) in the multi-line textbox. Just a suggestion. Keep up the good work :)

Wise - November 9, 2011, 11:23 am
