Thread: [\[CHEAP\] Inspired Development - Web Services](#)

Novalty - October 9, 2011, 3:05 pm

Inspired Development

Things we offer

- Both high quality and clean code
- All custom code will be secure from SQL and XSS attacks
- Securing your code
- PHP
- Javascript / jQuery
- Flash / Actionscript
- HTML
- Website designs
- Forum installation
- CMS installation

Prices

Each project will have its own needs and specifications meaning we will find it incredibly hard to provide a fixed price for each service.

If you are interested in our services then feel free to PM me with relatively detailed information about what you need done and I will reply ASAP with a quote.

You can provide us with a deadline, but the sooner it is, the more it will cost.

Payment

- Paypal

Portfolio

A lot of our websites are hosted on a private network meaning that I do not wish to post the IP publicly. If you wish to see examples of our work then feel free to PM me and I will either give you a link or some other form of contact in which you will be able to view the portfolio.

Vouches

For vouches please look at my reputation. As we get customers, I will also add some more vouches here.
