Thread: [\[Tutorial\] How to get JavaFeed on bidtraffic. 100% guarenteed. new method. VOUCHED!](#)

Happy Slap - October 12, 2011, 2:40 am

Hello,

This is a new method on how to get java feed on bidtraffic. It works 100% every time if you do it right.

Step 1.

Download kemulator from [here](#)

Once you have downloaded kemulator, extract it to your desktop.

Step 2.

Download opera mini [here](#)

Save it to your desktop and DO NOT EXTRACT IT!!

Step 3.

Open kemulator (open the file that has a picture of the mobile phone). Once its open click midlet at the top right then click load jar, and select opera mini.jar. It should load up.

Step 4.

A screen should appear saying welcome and some other crap just click Accept on the bottom left. Now on opera mini go to bidtraffic.com and log it. You should see java feed there, leave opera mini open and just minimize it.

Step 5.

Open Firefox, it only works on firefox, and log into bidtraffic. Java feed should be there. Close opera mini and delete it if you want, you dont need it anymore.

There! Everytime you log into bidtraffic java feed should be there.

Thanks, this is my first tutorial and I take credit for this.

VOUCHES!

works, I have now set some ads up not that many, but yes it works now for me,thanks you very much.

bufdaemon - October 15, 2011, 8:47 pm

does this worked? anyone have tried? any reviews?

brainy0 - October 16, 2011, 11:47 pm

tried it, and all i can say is thank you :)

If you try it too and you can't see the javascript option in Firefox, just clear your cookies!
