It's the negatives that you have to watch out for.

Haha, well a mod merged my account into one that was like a year old, so Boosting-Services.com is 100% clean

YouTube channel views are way different than YouTube video views. Channel views don't have a logarithmic complex system, when video views do. I can assure you that our YouTube Channel views are 100% delivered, and are great for boosting your channels! (Since we already are know, we don't offer trial views/services, sorry)

well then i cant buy for you, telling me your stuff is 100% legit and always delivered doesnt mean anything, thats like selling a vitamin and saying you loose weight 100% guaranteed when you no its not

Fair enough you don't let anyone test your services, Yet you say that it's %100 guaranteed that you will get views without anybody vouching for you.

You will find it easier selling whatever you have if you just let someone test out your services and let them vouch for you, Give someone with a high rep a go and let them vouch for you to make your business much smoother.
