Thread: [\[Tutorial Easy\] How to get on blocked sites at School \[Tutorial Easy\]](#)

**iSwagger** - October 12, 2011, 10:19 pm

Appreciate's Tutorial

It is very easy.

1. Go on the School Computer
2. Go to [www.google.com](http://www.google.com) and then go on Google Translate
3. Just choose any language to English
4. Enter the website you want to go on.
5. Now just press Translate Congratulations you are on the site without getting Blocked.

Enjoy :)

**zomg waffles** - October 12, 2011, 11:19 pm

This worked for like a week.. but they caught on and blocked it. :/

**petersmileface** - October 13, 2011, 1:28 am

Sounds interesting, I've got to try this tomorrow!

Thanks for sharing this, appreciate it :)

**Clones** - October 13, 2011, 2:31 am

This is very helpful to me, thanks for sharing :)

**TeamAntelope** - October 13, 2011, 11:15 am

Great idea, but several IS depts. already know this trick. Use it while it lasts!

If that doesn't work, try loading the page with HTTPS.

**ThatGoatherd** - October 13, 2011, 11:50 am

That trick never worked at our college or school, using https sometimes did, as did connecting via IP address.

**EjM** - October 13, 2011, 12:23 pm

My school fixed this -.- They fixed almost everything, even cached page.

**JrSadFish** - October 13, 2011, 12:25 pm

i use ultrasurf, works like a charm for me. this method doesn't work at my school

**jazz89** - October 13, 2011, 1:33 pm

Nice and works perfectly now i can login most the websites was blocked :D

**iSwagger** - October 13, 2011, 3:30 pm

Yea guys I know some school have fixed this but some school didn't

**MisterPain** - October 13, 2011, 3:51 pm

I will try this tomorrow at school, if it works I'll post back here :).

**iSwagger** - October 13, 2011, 3:55 pm

Ok be sure to post back if it works on your school :)

**keith190** - October 13, 2011, 4:21 pm

Out of date now :( update please u can aslo try some proxis just have fun trying to beat them to it or u can even copy a prox website and make ur own to it and use use it yourself.

**iSwagger** - October 15, 2011, 5:38 pm

I didn't get what are you saying please explain more :)

**Loser Douche Bag #35** - October 15, 2011, 6:55 pm

or you can just type in <https://www.facebook.com>

With the s in it. Found that my self.

**iSwagger** - October 15, 2011, 7:03 pm

Yup you can do that to very nice :)

**ramosgomez** - October 16, 2011, 12:07 am

knows this trick. good for pple who don't know

**iSwagger** - October 16, 2011, 9:33 am

Yea Like I said some people already know this and some people dont

**Jexopert** - October 16, 2011, 10:16 am

i already know this trick , but you don't see any pictures... :( and everything is on the wrong place...

other trick: try `http>>>s<<<://www.bla.com`

[without <>]

you can also try using TOR or a proxy...

**iSwagger** - October 16, 2011, 1:07 pm

Yes you do I went on Hackforums.net on it and it worked fine but only problem was I didn't want to sign in

**petbak123** - *October 16, 2011, 1:29 pm*

Look's cool, i might try it, but i think my school may have blocked it

**iSwagger** - *October 16, 2011, 1:58 pm*
