Thread: [Hidden files...?](#)

doxis - October 13, 2011, 10:06 am

hmmm, as i wrtoe before i think my pc is hacked.

Idk if the hacker / virus is gone because i dont get any warnings or something been hacked YET.

But i see that i have something that is hidded

you will see in this picture

[img]http://i54.[censored].com/66d737.jpg[/img]

OMG, IS [censored] DELETED FROM THIS FORUM SO I CANT WRITE IT?!

http://i54. tiny pic .com/66d737.jpg (just delete the spaces)

The white circles is that its a HUGE space there, in the status bar and i asking if it could be an virus?

I have use this program and using the botkill and more.

(Infested Cleaner)

Best regards

PS, scanned with avg, mbam, santispyware, SOON ESET 5

Hello,

To clean up your computer, 'Infested Cleaner' isn't the best way, please, do the following-

Read and follow this [thread](#), describe your issue as most as possible, be specific. Then copy and paste the logs at [PasteBin](#). Now, post the PasteBin links in a new thread in the following section called [HijackThis Log Analyzer and Tutorials](#), the HJT Helpers will help you as soon as possible.

Thank you.

Also scanned with some few anti virus programs but nothing, and why cant i write [censored] links?

Never mind, just reformatd my pc when the hacker start doing things in my system, thanks anyway! :)
