Hello all website defacers.....

I have found a great video for all of you.....

Just watch it and share your opinion.....

Hey bro, this is not a nonsense. Please watch it fully.

This video has a great msg to all defacers, who just deface sites without any reason, just to show off their SKID skills.

It's really a great video.

defacing random sites != skid

skid(s)= person(s) who use programs made by other people to hack.

so again some defacers are skids some aren't calling everyone who defaces a skid is a insult to those with actual skills (thethatguy, haxor (the intra one not that skiddy SLH fag))

But I am calling them SKID, just because they deface sites to increase the cyber war.. no one get benefit from that. They are using their experience in wrong way..
Just watch this video, what is being said in that video..
