Just like your other themes, it looks too bland and boring to me.

Agree ^ And try to add a lighting effect on the hover button I think that'll look better.

The only thing i would change would be the separator. I don't like how it fades out to the left, in my opinion it would look better if it faded evenly on both sides if you understand what I'm trying to say, lol.

It does look nice, but If it was me I would probably add another colour in there. Like an outline or something.
